Pratibimba

Annual Magazine 2025-26 - FIRST EDITION

His vision is to provide various platforms for the youth to learn and imbibe the quality of service and leadership through which, they would be empowered to give back to society, whatever they owe...

Sri. G. C. SURANA

Industrialist, Entrepreneur and Visionary

1941 - 2008

Vision

"To be the educational institution of preferred choice by ushering in convergence of knowledge, skills and values through holistic education."

Mission

"To Mould Characters and Careers."

Motto

"Vidyadhanam Sarvadhanapradhaanam."
('Education is the supreme of all wealth')

Chairman's Message

It gives me immense pleasure to share a few thoughts as we bring out the inaugural edition of Surana PU College's magazine, Pratibimba. A college magazine is much more than a collection of articles and photographs. It is a meaningful tool for communicating with the external world about what is happening within the institution and the spirit that drives it.

In many ways, a college magazine is similar to the annual report of a corporate organization. Just as investors and stakeholders are keen to understand the progress, direction, and achievements of a business, parents and well wishers who have invested their trust in the institution would like to know how the college is shaping young minds. This magazine becomes a transparent and thoughtful way of sharing milestones, initiatives, student accomplishments, and the overall journey of the academic year with the larger community.

The name Pratibimba is aptly chosen. It signifies reflection, and this magazine truly reflects the identity, aspirations, and collective efforts of students and faculty.

Beyond informing stakeholders, Pratibimba also serves as a cherished timeline. Years later, when students look back as alumni, these pages will remind them of their friendships, competitions, cultural events, and academic milestones. There is an inherent sense of nostalgia in every edition, making it a keepsake that grows more meaningful over time.

I congratulate Karthik, the Principal, and his entire team for their dedication in bringing out this inaugural edition. May Pratibimba continue to reflect excellence and inspire many more editions in the years ahead.

Dr. Dilip Surana
Chairman and Managing Director, Micro Labs

Managing Trustee's Message

Surana PU College has always been abuzz with activity. Over the years, the campus has been alive with academic milestones, cultural celebrations, competitions, leadership initiatives, and countless moments of learning and growth. Every corridor carries stories of effort, achievement, and self-discovery. It is therefore both timely and meaningful that the team has chosen to capture this vibrant journey in the form of a college magazine.

The title Pratibimba is beautifully chosen because reflection is at the heart of the PU experience. The Pre University years form a crucial bridge between school and graduation. This is the phase when students gradually begin to think independently, make decisions on their own, and take responsibility for shaping their future. Before they step into undergraduate life as young adults, these years allow them to explore who they are and what they aspire to become.

It is also a period when creativity, confidence, and self-expression are at their peak. Students discover new interests, develop talents, question ideas, and build clarity about their goals. A magazine such as Pratibimba becomes a natural extension of this journey. It offers a platform for voices to be heard, ideas to be shared, and achievements to be celebrated. It brings together individual reflections and transforms them into a collective narrative of the institution.

I warmly congratulate all the students and teachers who have worked with dedication towards writing, editing, proofreading, structuring, and shaping this inaugural edition.

Dr. Archana Surana
Chief Mentor and Managing Trustee, Surana Educational Institutions

Principal's Message

Preface

It gives us immense pride and happiness to present the first edition of Pratibimba — a reflection of creativity, talent, and collective spirit within our college community. True to its name, Pratibimba serves as a mirror that captures the vibrant thoughts, achievements, aspirations, and expressions of our students and faculty. It stands as a platform where ideas meet imagination, and voices find meaningful expression.

A college magazine is more than a compilation of articles and artworks; it is a chronicle of shared experiences, intellectual growth, and cultural richness. This inaugural edition marks a significant milestone in our institution's journey, encouraging students to explore their creativity, develop confidence in communication, and celebrate diverse perspectives. Through its pages, we hope to nurture curiosity, inspire innovation, and strengthen the bond among members of our academic family.

I extend my profound thanks to our Managing Trustee, Dr. Archana Surana for pushing us to come up with a magazine right from day one. I also extent my humble pranams to Dr. Dilip Surana, CMD, Micro Labs Ltd., for his unwavering support and motivation. This publication would not have been possible without the dedication, vision, and relentless efforts of Lekshmi Ma'am, our English Faculty and her committed team, who worked tirelessly to bring this dream to life. The efforts put in by Mr. Hariharan, Mr. Vinay, the entire Teaching and Supporting staff is highly commendable. Their guidance, encouragement, and meticulous coordination have transformed ideas into a meaningful and vibrant publication. We deeply appreciate their passion and perseverance in shaping Pratibimba into a worthy representation of our institution's spirit.

We also extend our heartfelt gratitude to all contributors and supporters whose creativity and hard work made this edition possible. May Pratibimba continue to grow with every edition, inspiring generations of students to reflect, express, and excel.

With best wishes for the success of this maiden edition and many more to come!!

Karthik Krishnan B
Principal, Surana Ind. PU College

PRATIBIMBA : Annual Magazine 2025-26 of Surana Independent PU College, Peenya, printed and published by the Principal, on behalf of the college.

EDITORIAL NOTE: Creative Expressions often emerge from a rich interplay of thoughts and ideas. **'PRATIBIMBA'** is a heartfelt compilation of such reflections, showcasing the intellectual, creative and experiential journeys of the Students and Lecturers of our college.

As we flip through the pages of this annual magazine, we step into a vibrant space of individual perspectives, moments of joy and sorrow, thoughtful interpretations, unique voices and artistic endeavors – reflecting the diversity of creative expression within the college community.

This being **our first issue,** it stands as a **proud milestone, representing** a significant step in documenting and mirroring the many dimensions of college life – academic pursuits, curricular and co-curricular activities, cultural and literary spirit - that shape our students.

Magazine Committee 2025-2026

Voices of our Achievers – their Experiences

COMMERCE TOPPERS – BATCH 2024 - 25

Varun S

My journey with the college as a PU student was really good. A balanced approach to education, which includes good interaction with teachers, value-based learning and teaching, and the culmination of sports and cultural activities into the academic journey, fuelled motivation, innovation, different frames of intelligence, and creativity, making the journey more amazing. The faculty were very interactive and friendly; they supported me throughout the journey. It is a moment of extreme pride, honour, and joy to represent the college as the topper, which proves that dedication, discipline, and faith can give results that can even defy logic.

Anushree J

Surana – A Path to My Confidence! When I joined the college, I never expected to become so confident in myself. This college taught me how to utilize the opportunities given to us. It gave me many chances to go on stage and overcome my stage fear. This college has been a building block for who I am today. I also shone in academics, thanks to the faculty who treated me like their own child and made the concepts simple and easy to understand. Most importantly, the college gave me opportunities in sports, for which I will always remain grateful. I had a wonderful experience here, and I am grateful to be a part of the Surana family. Overall, Surana is a perfect package of care, academics, and life skills. I miss it so much now!

Ambika K H

College life has been a beautiful journey of learning, growth, and self-discovery. From the very first day's nervous excitement to feeling confident and motivated, the campus soon became a place I truly loved. Our teachers were friendly, approachable, and always supportive, guiding us with patience and turning classrooms into spaces to grow. Being a topper was a proud moment, reflecting not just marks but the discipline, dedication, and values their guidance helped me build. Surana was also full of extracurricular activities, making every day exciting and memorable. Those college days, caring teachers, and the lively environment made Surana feel like home. Even today, I deeply miss those moments, the memories,the laughter, the spirit of Surana — they stay with me forever, inspiring me to aim higher and dream bigger. Surana - wasn't just a college, it was where dreams began and confidence was built. Surana will always hold a special place in my heart.

Voices of our Achievers – their Experiences

SCIENCE TOPPERS – BATCH 2024 - 25

Vinutha T S

Surana Independent PU College is not just an institution to me; it is a place that shaped my mindset, strengthened my discipline, and gave me memories that will stay with me for life. I lived two unforgettable years here. If I had to describe my PU life in one line, it would be serious studies during class hours and priceless memories in between. The heart of Surana is undoubtedly its teachers. They were our guides, motivators, and our second parents. They were strict when needed, patient when required, and motivating at the right moments. Surana also taught me lessons beyond textbooks—time management, perseverance, confidence, and the courage to keep moving forward even when things felt difficult. These two years shaped not only my academic path but also my character.

Prerana R K

I sincerely thank Surana Independent PU College, an institution that consistently strives for academic excellence, for the guidance and support provided in preparing students for both board examinations and competitive exams such as KCET and JEE. The residential coaching program, one of the thoughtful initiatives taken by the college, offered a disciplined and supportive learning environment under the guidance of experienced faculty, helping me gain better clarity and confidence in the subjects. Through this journey, the college helped me truly understand that while consistency can lead to success, inconsistency can never do so, a lesson that will stay with me beyond academics.

Anjankumar B H

My journey here was memorable and played an important role in shaping me not only academically but also in life. The college environment helped me develop discipline, consistency, and a focused approach toward my goals. The guidance and support from the management, principal, and teachers created a positive and encouraging learning atmosphere. The values and experiences I gained here continue to guide and motivate me as I move forward in my journey.

College Prayer

हमको मन की शक्ति देना

हमको मन की शक्ति देना मन विजय करें
दूसरों की जय से पहले खुद को जय करें
भेदभाव अपने दिल से साफ़ कर सकें
दोस्तों से भूल हो तो माफ़ कर सकें
झूठ से बचे रहें सच का दम भरें
दूसरों की जय से पहले खुद को जय करें

मुश्किलें पड़ें तो हम ये इतना कर्म कर
साथ दें तो धर्म का चलें तो धर्म पर
खुद पे हौसला रहे बदी से ना डरें
दूसरों की जय से पहले खुद को जय करें

Meaning

O God, give us strength to overcome our mind (wrong thoughts)
Before attempting to conquer others, conquer ourselves first

To cleanse our hearts of discrimination
If friends make mistakes, to be able to forgive them
Save us from lies, Make Truth our life
Before attempting to conquer others, conquer ourselves first

Whatever the difficulties we will continue to work
With the support of Dharma, tread the path of righteousness
We will remain self-confident, unafraid of evil
Before attempting to conquer others, conquer ourselves first

Our ACT Philosophy

HOLISTIC DEVELOPMENT OF STUDENTS

A C T

ACADEMIC **CO- CURRICULAR** **TRANSFORMATIONAL**

Working relentlessly in pursuit of perfection, we have crafted a strategically structured curriculum that follows the 'ACT Philosophy' – Academic, Co-curricular and Transformational Activities. Rooted in the ACT philosophy, our approach fosters not only academic brilliance but also vibrant campus experiences, emotional maturity and strong ethical values in our students thereby enabling them to contribute positively to society.

Safety First: Bengaluru City Police Awareness Session (1st December 2025)

Swatch Surana Abhiyaan - a step towards responsibility, a commitment to maintaining clean and productive learning spaces

ANNUAL REPORT 2025-26 - AN OVERVIEW

The academic year 2025–26 marked a significant phase of progress and excellence for our college. Driven by our ACT philosophy [Academic, Co-curricular, and Transformational activities], the Institution continued to uphold its commitment to quality education, academic integrity, and holistic development of students. Through a balanced blend of curricular, co-curricular, and extra-curricular activities, the college provided an enriching learning environment that fostered intellectual growth, creativity, leadership, and social responsibility. The dedicated efforts of the management, faculty, staff, and students collectively contributed to a dynamic, disciplined and productive academic year.

Major Events in Chronological order

Faculty Development Programmes were organized for Science faculty members on **9th April and 20th May 2025,** across all Surana PU branches. The sessions were conducted by **Dr. Nagarajan**, PU-Mentor, SEI, at the Southend Campus. The workshops focused on enhancing teaching methodologies, strengthening subject expertise, and promoting collaborative learning practices.

A Career Guidance Session was conducted by **Shri Karthik Krishnan.B Principal** on **26th May, 2025,** providing students with valuable insights into career planning and goal setting. The session offered clear guidance on identifying individual strengths, selecting suitable career paths, and setting realistic goals to achieve their aspirations. The interactive session inspired students to think ahead with confidence and clarity about their academic and professional journeys.

Safety and Emergency Workshop was conducted by **Lt. Sudarshan Chalapathi.V.S,** Associate NCC Officer, 8 Karnataka Battalion NCC, [Department of Commerce, Surana Degree College, Peenya], on **30th May, 2025,** to train students and staff in handling emergency situations, including the **proper use of fire extinguishers** and basic safety measures. The session enhanced awareness on fire safety, preparedness, and quick response during emergencies.

World No Tobacco Day, observed on **31st May 2025,** featured an awareness session conducted by the Police Department. The programme highlighted the harmful effects of tobacco use and emphasized the importance of making healthy, responsible lifestyle choices among students.

Aarambh 2025 – Parent Orientation Programme held on **8th June 2025** brought together parents and faculty to establish a collaborative partnership. The programme focused on familiarizing parents with college practices, academic expectations, and student support systems to ensure holistic development and a successful academic journey. **Toppers and distinction holders** of March 2025 PU Board Examination were felicitated to recognize their academic excellence and outstanding performance.

Bridge courses were conducted for I PU Students to address learning gaps and strengthen students' foundational understanding.

An educational visit to **IISc Bangalore on 12th June, 2025** enabled students to explore one of India's leading research institutions and gain meaningful exposure to advanced scientific research and innovation.

Yoga Day Celebration held on **21st June, 2025,** marked the importance of yoga in promoting physical, mental, and emotional well-being. The programme encouraged students and staff to embrace yoga as a path to inner strength and serenity, fostering a healthy and mindful campus environment.

International Day against Drug Abuse, observed on **26th June 2025,** included an awareness session conducted by the Police Department. The programme educated students about the dangers of drug abuse and promoted awareness about prevention, responsible choices, and a healthy lifestyle.

A week-long **Soft Skills Development Sessions (30th June – 7th July 2025)** were designed to enhance students' personal attributes, interpersonal and professional skills, preparing them for career readiness and personal growth. The sessions were led by Mrs. Siddhi Jain, Founder and Lead Trainer at Flourish.

Compassion in Action by Our Tender Hearts - a visit to a Home for underprivileged Children was organized on **5th July 2025,** which provided students with an opportunity to engage in meaningful service and empathy-driven interaction. The visit encouraged social responsibility, kindness, and a deeper understanding of community care among students.

Fresher's Day was celebrated on **14th July 2025,** welcoming new students to the college community. The event offered a platform to introduce the freshers to campus life, foster camaraderie, and inspire them to embark on their academic journey with enthusiasm and confidence.

Independence Day was celebrated on **15th August 2025,** commemorating the spirit of freedom and the nation's rich legacy, engaging students in activities that promoted patriotism, unity, and a deeper appreciation for our country's values and heritage. As a part of the celebrations, a **Colour Week** based on the national flag colours was organized.

Faculty Development Programmes were organized for Computer Science and Language faculty members on **19th August 2025,** across all Surana PU branches. The sessions were conducted by **Dr. Nagarajan,** PU-Mentor, SEI, at the Southend Campus. The workshops emphasized effective teaching strategies and fostering collaborative learning.

Manthana, held on **21st and 22nd August 2025,** showcased the diverse talents of our students. The event [30 competitions] featured a **college-wide talent hunt,** providing a platform for students to demonstrate creativity, skill, and innovation, celebrating brilliance and potential within our institution.

The **PU Inter-Collegiate Chess Tournament** was conducted on **29th August 2025** at Surana College, Peenya, commemorating National Sports Day. The tournament witnessed active participation from PU colleges, encouraging strategic thinking, discipline, and sportsmanship among students. The event highlighted the importance of intellectual sports in holistic student development.

On **1st September 2025,** the college conducted its **student council elections,** selecting Class Representatives for the Academic, Cultural, Sports, and Discipline committees.

Department of School Education (Pre-University) Bangalore North District in collaboration with Surana Ind. PU College successfully conducted the Bangalore North Taluk and District Level Inter-Collegiate **Table Tennis Tournament 2025–26** at our campus on **3rd and 4th September 2025.** Sri. Palaksha, Deputy Director, Department of School Education (Pre-University), Bangalore North District, graced the occasion as the Chief Guest. The tournament saw active participation from various colleges across the district, promoting sportsmanship and competitive spirit among students.

Teachers' Day, celebrated on **8th September 2025,** was a heartfelt tribute by students expressing gratitude and love for their teachers. The event included performances and activities that highlighted the guidance, support, and inspiration provided by the faculty throughout the academic year.

Teachers' Day Celebration, on **4th October 2025** at Peenya Campus, was thoughtfully organized by our Management. This event brought together Staff from branches of Surana Institutions across Bangalore. The event, themed 'UNITY IN DIVERSITY', celebrated the teachers' dedication, guidance, and invaluable contributions to shaping the students' growth. PU College, Peenya was declared the winner.

Lakshmi Pooja was organized in the college to seek the divine blessing of goddess of peace, prosperity and fortune on **16th October, 2025.**

Kshithij – "Battle of Brilliance", held on **7th November 2025** - An interschool competition was organized to foster excellence through healthy competition. The event brought together students from various schools, encouraging talent, teamwork, and creative expression. The event concluded with valedictory function and prize distribution.

Children's Day, celebrated on **18th November 2025**, brought alive the colours and joy of childhood. The event featured fun-filled activities and performances, fostering creativity, laughter, and a sense of togetherness among our students.

The English Club, 'Thinkspace', aimed at enhancing Student's language skills and communication, was inaugurated on **18th November 2025** by our Principal, **Shri Karthik Krishnan.B.** The club will serve as a platform for students to enhance their English proficiency through interactive sessions and activities, while providing opportunities for effective communication and self-expression.

Safety First: Karnataka Police Awareness Session was organized on **1st December 2025,** to educate students on personal safety, legal awareness, and responsible conduct. The session threw light on the various **initiatives of the Bangalore City Police,** focusing on public safety, crime prevention, and community awareness. Students were informed about support systems, helplines, and measures aimed at ensuring a safe society.

Mock Interview Sessions were organized for **II-year students** from **3rd** to **12th December 2025,** to enhance their interview skills and career readiness. The sessions helped students build confidence, improve communication, and gain practical insight into professional interview processes.

An exceptional **15-day Residential** Programme from **December 8th 2025,** was offered to selected students from the Science (Integrated) stream at the Guest House in Kudulu, to strengthen their preparations for Examinations. Six students from our campus attended this programme.

Annual Sports Meet 2025–26, held on **23rd December 2025,** was an energetic celebration of athletic talent and determination. The event featured **a variety of group and individual competitions,** inspiring students to showcase skill, teamwork, and resilience, providing every participant an opportunity to demonstrate sportsmanship.

An **excursion to Club Cabana** was organized on **26th December 2025,** providing students with an opportunity to unwind and enjoy a day of recreation and bonding. The outing created memorable experiences, leaving lasting memories for all our students.

Naish, held on **27th December 2025,** was a magnificent celebration of talent, tradition, and triumph. The annual college fest featured exciting performances by students, creating memorable moments filled with energy, enthusiasm, and applause. Our former students also performed on stage, reaffirming their lasting connection with the institution.

Republic Day was celebrated on **26th January 2026,** with pride and patriotism, honoring the adoption of the Constitution of India. The programme included flag hoisting and cultural activities that reinforced the values of unity, democracy, and national integrity among students and staff.

An Orientation Programme aimed at strengthening Students' Confidence to face Final Examinations, was conducted by **Shri Karthik Krishnan.B,** Principal on 9th February 2026. The session focused on examination preparedness, effective study strategies, stress management, and the importance of maintaining a positive mindset. The Principal motivated students to approach their final examinations with clarity, discipline, and self-belief. The programme served as a valuable initiative in guiding students towards academic success and emotional resilience.

Saraswati Pooja was organized in the college to seek the divine blessing of goddess of knowledge on **19th February 2026**.

Farewell Day – 17th March 2026, a heartfelt occasion marking the conclusion of the academic year and the beginning of new journeys. The event celebrated friendships, shared memories, and aspirations, as our II-year students stepped forward with confidence toward their dreams and future endeavors.

Regular activities such as **morning assemblies and notice board activities** were conducted consistently to promote discipline, awareness, and student engagement.

Parent–Teacher Meetings (PTMs) were held periodically to regularly update parents on students' academic progress, performance, and overall development, ensuring effective communication and support.

Swatch Surana Drive – A cleanliness initiative conducted to instill a sense of civic responsibility among students and to create awareness among students about the importance of hygiene and teamwork.

Students' performance was continuously assessed to identify areas for improvement, and by recognizing the unique strengths, weaknesses, and learning needs of each student, focused support and special training were provided to help them achieve their full potential and enhance overall academic performance.

DEPARTMENT OF PHYSICAL EDUCATION

Meghana G.D, [I CEBA] has won Gold Medal in Women's Doubles Tennis at the All India Tennis Association Tournament, held at Santanur Road, Yelahanka, on 15/09/2025.

Alumni Corner

Forever Connected

If I Travel Back in Time...

I wonder if there is a lot to say about Surana College...
Even every corner, every wall had its own stories to say ...
every lecture had that charm and knowledge that made us feel blessed...

In the storm of confusion and nervousness,
The path that unlocked a new gate to the next level,
In the vast world of overthinking I felt the light.

That enlightened my mind with their colours,
Nobody could lend me but they did...
In the age of distractions and attractions,
Surana college had been the rain shower
that made us unique and special,
The maturity and strength even to face anything,
They didn't give only education,
They gave me the power and strength to face and hope to reach the mountain peak to see through my soul..To see what we are,
To be the one with kindness,
courage and honesty and disciplined...

Surana had been a gate for one that wishes ,
The one that everyone can't judge by its cover, The one that molds the character as its motto... It's been everything I needed...
Just like the firefly in the darkness and showed the right path,
The lecturers have been fireflies
that motivate everyone,
They were friendly and caring and
that made everyone wonder ...
If I turn and look back it's now just a memory which still cherishes and lights up a glow in my heart..

My Journey at Surana: A Transformation beyond Academics

I am Darshan, a student of the 2021-22 batch. Looking back, my time at Surana Ind. PU College was the ultimate turning point in my life. It completely transformed my perspective on my future and my approach to studies. Whenever I faced challenges, the supportive college environment and the guidance of my lecturers helped me evolve—a sentiment I proudly shared during our farewell as well. What makes this college stand out is its vibrant, engaging atmosphere. From sports events to cultural fests, there is always something happening. The college doesn't just focus on the syllabus; they actively encourage students to showcase their unique talents and skills.

The Principal and the faculty are incredibly supportive in every aspect. However, it is up to us as students to utilize their expertise properly. They truly celebrate our success as their own.

I can proudly say that our college provides a perfect balance of quality education and co-curricular excellence. This isn't just my opinion—many others who joined based on my reference have shared the same positive experience. This isn't a promotion; it is my honest gratitude. If you are ready to give your 100%, I guarantee you will have a similarly life-changing experience here.

When Memories Lead

When the wind blows,
When life darkens,
When the mind pops,
When memories lead,
Then my eyes speak
with little drops—
they drop down,
and my heart breaks down.

My eyes went blind,
My thoughts went wide.
I felt like drowning in the ocean,
I felt like falling from a height.
I'm losing my hopes,
I'm getting weaker...
But the memories lead...
Yes, the memories lead...

When the wind blows,
When life darkens,
When the mind pops,
When memories find their way...

Mind is made of diamond;
it reminds what you are.
Heart is made of gold;
it is made of purity...
It reminds how you want to be...

Life is a challenge
in which you are the challenger...
My inner core wants to cry aloud,
but still wants to be silent.
I want to share my pain,
but still hide it behind.
I want to live in the present,
but still live in a fake world.
But I don't want to fake...
Still, the memories haunt me
until the past goes away.

I will be in the darkness zone.
I know it's hard, but still...
I'm so hopeless...
But I know what I am—
I can break the boundaries of pain.
But still... But still...

When the wind blows,
when life darkens,
when the mind pops,
when memories lead...
When memories lead,
when the past reminds the pain...

Learning, Laughter and Growth

My journey at Surana College has been filled with learning, laughter, and growth. Beyond lectures and deadlines, I discovered confidence, friendships, and small moments that made everyday college life special. Each experience shaped me quietly, preparing me for what lies ahead. As I step forward, I carry with me gratitude, memories, and values that Surana College will always be a part of.

Nikhitha Jangid
2021-23

My Journey at Surana College

My journey at Surana began with excitement, nervous smiles, a head full of confusion and doubts, neatly covered textbooks, and the famous first-day thought: "Will I survive science?" Very soon, that question was replaced with "When is the next test?" and a serious promise to myself: "This year, I will study sincerely from day one," made during the Aarambh event. Like most students, that promise lasted exactly a few days.

Soon, reality set in with regular tests, surprise questions, and the famous PU question: "Portion completed or not?" That was when I learned that consistency is the key to success. My two years at Surana were nothing short of a roller-coaster ride—from rushing to class before the bell, revising formulas during short breaks, to canteen talks and corridor laughter that became beautiful moments.

Every Surana student knows the feeling of revising an entire chapter during a short break, whispering answers before a viva, and walking into the exam hall with confidence on the face but panic in the heart. We learned how to calculate marks faster than calculators and how silence before a test can be louder than noise. Between all this seriousness were beautiful moments—laughing with friends after long classes, discussing answers and then realizing everyone had written something different, sharing notes like precious property before exams, and those small smiles exchanged during practicals that silently said, "We'll survive this together." These were the moments that made Surana feel like a second home.

The heart of Surana is undoubtedly its teachers. They were our guides, motivators, and sometimes our second parents. They were strict when needed, patient when required, and motivating at the right moments. At that time, we may have thought they enjoyed giving tests, but today I realize that every question paper was a step towards strengthening our future. Their endless explanations, constant motivation, and firm belief in us pushed us to do better every single day.

Surana also taught me lessons beyond textbooks—time management, perseverance, confidence, and the courage to keep moving forward even when things felt difficult. These two years shaped not only my academic path but also my character.

To the students who are currently walking through those corridors: when the syllabus feels heavy and the pressure feels overwhelming, remember that every challenge here is shaping your future. Trust the process, respect your teachers, support your friends, and believe in yourself. One day, you will look back and smile, realizing that Surana gave you not just education, but direction.

With deep gratitude and pride,

Vinutha T. S.
2023-25

Beautiful Journey of Learning

Entering college marked a new and exciting phase in my educational journey filled with learning, challenges, and growth. This achievement was possible because of the constant support, motivation, and guidance of my teachers, who always believed in me and encouraged me to give my best.

Their patience, dedication and positive words towards the students gave confidence during challenging times. They guided me not only in academics but also in co-curricular activities.

I am truly grateful to Surana Independent PU College and my teachers for shaping my learning journey and inspiring me to achieve success.

I will always carry the values and inspiration given by my teachers at Surana college in my heart with deep gratitude and respect.

Vasundara P
2023-25

I Miss My PU College

I am immensely proud to be a student of Surana Ind PU College. My experience in this college has been very positive. The support I received from teachers made my learning journey smooth and enjoyable. This college taught me not only academics but also discipline and responsibility, which helped me achieve better results.

Surana Ind PU College holds a special place in my heart, and I truly miss the memorable days spent here. Being a topper is an honour for me, and I feel it comes with a responsibility to motivate other students to believe in themselves and work consistently toward their goals.

Soundarya
2023-25

From the Surana Team: A Spectrum of Thoughts

Living in Harmony with Tigers

India is home to nearly 75% of the world's wild tigers, making tiger conservation our shared responsibility. It reminds us of the importance of peaceful co-existence between humans and tigers.

Tigers are not just beautiful animals; they play a very important role in nature. They are apex predators, which means they keep the population of herbivores like deer under control. This helps maintain balance in the ecosystem. Tigers are also known as keystone species—when we protect tigers, we automatically protect forests, rivers, and many other plants and animals.

To protect one tiger, nearly 25,000 acres of forest must be conserved. These forests help reduce pollution, absorb carbon dioxide, regulate rainfall, and act as natural shock absorbers against climate change. Many major rivers flow through tiger reserves, providing clean water, preventing floods, enriching soil, and supporting agriculture and aquatic life.

Tigers also support the economy. According to the NTCA (National Tiger Conservation Authority), a single live tiger can generate up to ₹500 crore in tourism revenue during its lifetime through safaris, hotels, transport, local guides, food, and handicrafts. This creates employment and spreads awareness while reducing poaching.

However, increasing tiger numbers and shrinking forest areas have led to human-animal conflicts. Often, animals enter villages because humans have already entered forest habitats. The solution lies in better planning, awareness, and voluntary relocation where needed.

As future custodians of nature, we can help by avoiding plastic, reporting poaching, not using animal products, and respecting wildlife laws. Saving tigers is not just about saving nature—it is about saving ourselves. The message is simple: Live and Let Live!!

Karthik Krishnan B
Principal

Discipline:

The Foundation of a Bright Future

Pre-University education is not merely a bridge between school and higher studies; it is the stage where character is shaped, habits are formed, and young minds are prepared for the responsibilities of adulthood. These two years are among the most transformative stages in a student's life. At this crucial phase, discipline plays a vital role in building a wonderful life ahead.

As a member of the College Discipline Committee, it is part of my responsibility to ensure punctuality, proper uniform, trimmed nails, neat hair, and respectful behavior among students. To young students, these may seem like firm rules or unnecessary restrictions. However, these practices are not about control, they are about grooming. Discipline is not punishment; it is preparation. Discipline trains the mind to stay focused, the heart to stay grounded and the individual to remain consistent even in challenging situations.

Regular attendance and punctuality teach students responsibility and respect for others' time. Wearing the prescribed uniform develops a sense of equality and belonging. Maintaining personal hygiene and neatness builds self-respect and confidence. Following rules shapes consistency and accountability. These simple habits gradually grow into lifelong values and quietly become strengths that support them throughout life.

In the PU level, students may not immediately understand why such discipline is emphasized. But when they step into professional courses,workplaces, or leadership roles, they begin to realize that punctuality, presentation, and self-control are essential qualities in every field. What once felt strict becomes meaningful.

Years later, when some of our students return to campus, they often share how those disciplined routines helped them. They express gratitude for the grooming they received here. That is when we, as teachers, feel reassured that our firmness had purpose.

Discipline is the foundation upon which success is built. Knowledge may open doors, but discipline keeps those doors open. It shapes not just good students, but responsible adults. And when our students grow into confident individuals who carry these values forward, we know that the lessons taught within the walls of a PU college have truly served their purpose.

Kashinath.S
Lecturer
Department of Economics

Sports and Physical Education

at Surana College, Peenya

Sports and physical education play a vital role in shaping the overall personality of students at Surana College, Peenya. The Department of Physical Education actively encourages students to participate in various sports and games to maintain physical fitness, mental strength, discipline, and teamwork.

Under the guidance of Dr. Santhosha M S, Physical Education Director, the college organizes regular sports activities, intramural competitions, annual sports meet, and fitness programs. Students are motivated to take part in outdoor and indoor games, athletics, yoga, and wellness activities, which help in building leadership qualities and sportsmanship.

The department also supports talented sportspersons by providing proper training and opportunities to represent the college at intercollegiate and university-level competitions. Equal importance is given to both academics and sports, ensuring the holistic development of students.

Surana College continues to promote a healthy and active campus environment, believing that a sound mind resides in a sound body.

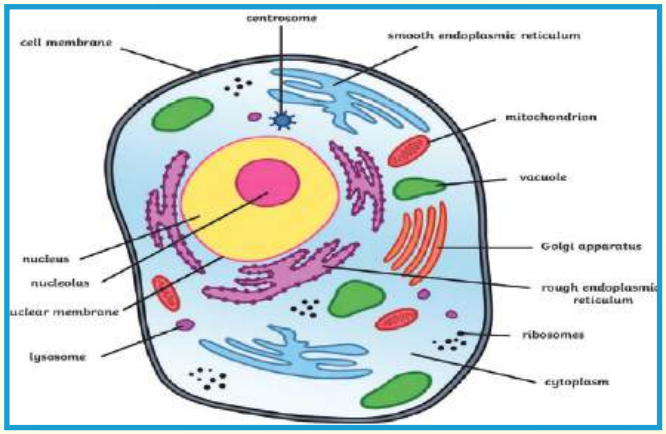

Dr. Santhosha M S
Physical Education Director

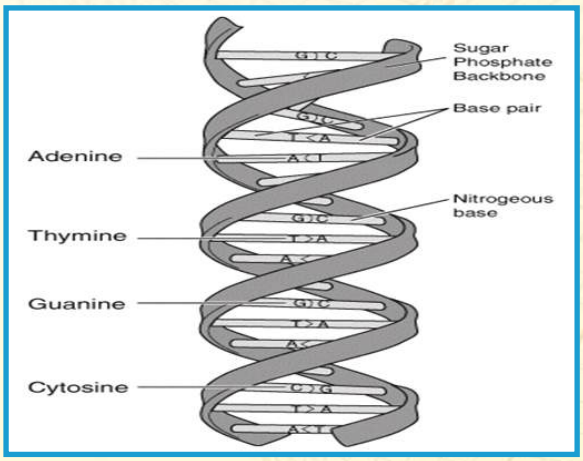

Biology

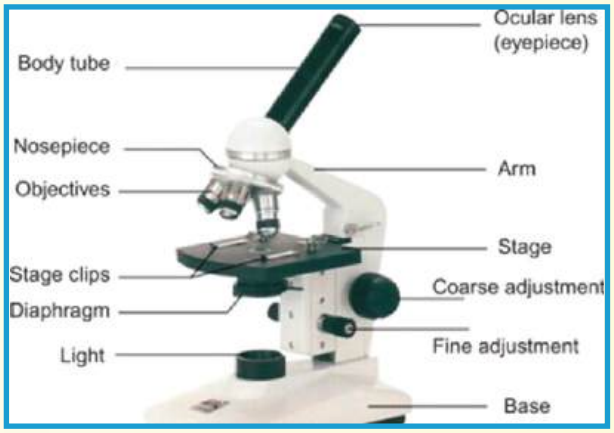

The Science of Life and its Ever-Growing Importance

Biology is the scientific study of life — from microscopic molecules inside a cell to complex ecosystems that sustain our planet. It explains how living organisms grow, reproduce, evolve, and interact with their environment. In today's rapidly advancing world, biology is not just a subject in textbooks; it is the foundation of medicine, biotechnology, environmental conservation, and even artificial intelligence–driven research.

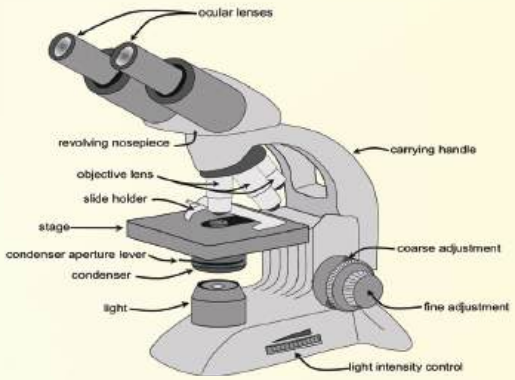

The Foundation of Biological Understanding

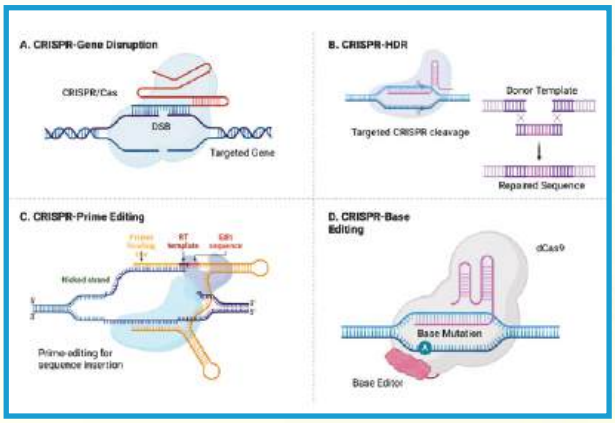

Biology is built upon core concepts such as cell structure, genetics, evolution, physiology, and ecology. The discovery of the DNA double helix by James Watson and Francis Crick revolutionized our understanding of heredity. Their work laid the foundation for modern genetics and biotechnology.

The cell, often called the basic unit of life, performs countless biochemical reactions essential for survival. From the beating of the human heart to the photosynthesis occurring in plants, biological processes maintain the delicate balance of life on Earth.

Biology in Medicine and Healthcare

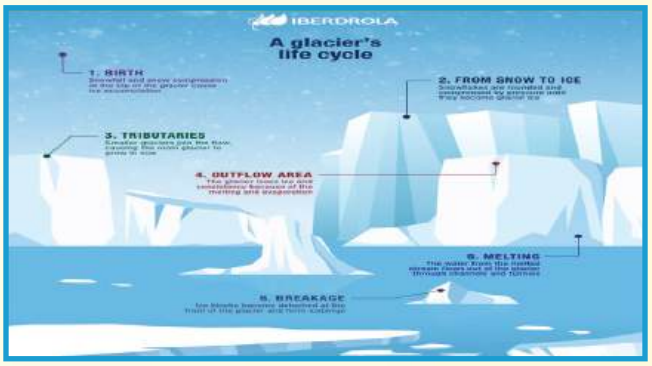

Biology plays a central role in medical science. Advances such as mRNA vaccines, gene therapy, and diagnostic imaging are outcomes of biological research. The development of the CRISPR gene-editing technology by scientists like Jennifer Doudna has opened new possibilities for treating genetic disorders.

Understanding microbiology and immunology has enabled humanity to combat deadly diseases. The global response to pandemics demonstrates how essential biological knowledge is for safeguarding public health.

Environmental Significance

Biology helps us understand ecosystems and biodiversity. Environmental biology studies how organisms interact with each other and their surroundings. In an era of climate change and habitat destruction, biological research guides conservation efforts and sustainable development.

Ecologists and environmental biologists work to protect endangered species, restore ecosystems, and maintain ecological balance. Without biology, effective conservation strategies would not be possible.

Biotechnology and the Future

Modern Biology has given rise to biotechnology — a field that merges biology with technology. From genetically modified crops that enhance food security to bioinformatics that analyzes massive genomic data, biology drives innovation.

The completion of the Human Genome Project marked a milestone in understanding human genetics. Today, fields such as synthetic biology, stem cell research, and personalized medicine are shaping the future.

Importance for Students and Society

For students, Biology develops:

- Scientific thinking and analytical skills
- Problem-solving ability
- Ethical awareness regarding life sciences
- Awareness of health and environmental issues

Biology also offers diverse career opportunities in medicine, research, pharmaceuticals, environmental science, biotechnology, agriculture, and education.

Conclusion

Biology is not merely a subject; it is the story of life itself. It connects humanity with nature and empowers us to improve the quality of life through scientific advancement. As we step further into the 21st century, biology will continue to answer fundamental questions about life while solving some of the greatest challenges facing our planet.

Understanding biology means understanding ourselves — and safeguarding the future of life on Earth.

Erwin Raja
Lecturer
Department of Biology

Chemistry

From Atoms To Innovations

Chemistry is not just a subject in textbooks—it is the science of everyday life. From the moment we wake up until we go to sleep, chemistry quietly supports and shapes our world.

1. Chemistry in Our Body

Our body itself is a living laboratory. Digestion, breathing, and even thinking involve chemical reactions. Oxygen combines with glucose to release energy. Hormones regulate emotions. Medicines work through chemical interactions in our body.

2. Chemistry in Food

Cooking is chemistry in action. When rice softens, milk turns into curd, or vegetables change colour while heating, chemical changes take place. Preservatives help keep food fresh and safe.

3. Chemistry in Medicine

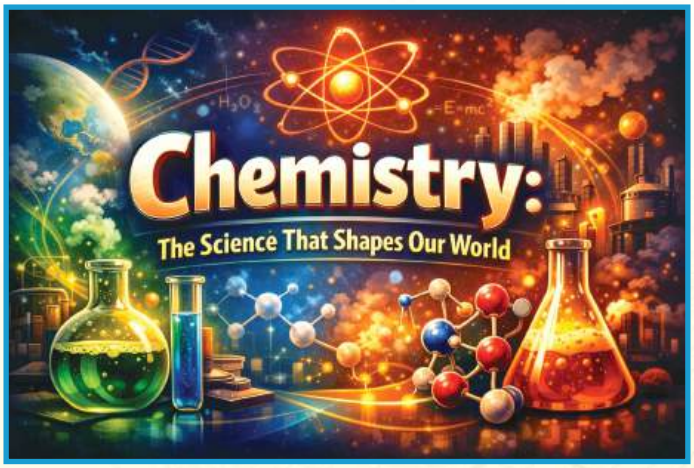

Modern medicines, vaccines, and disinfectants are products of chemical research. From simple pain relievers to life-saving drugs, chemistry helps prevent and cure diseases.

4. Chemistry in Agriculture

Fertilisers, pesticides, and soil testing methods improve crop yield and food quality. Without chemistry, feeding the growing population would be difficult.

5. Chemistry in Daily Products

Soap, shampoo, toothpaste, detergents, perfumes, plastics, paints, fuels—almost everything we use daily is the result of chemical processes.

6. Chemistry and Environment

Chemistry helps us understand pollution, water purification, recycling, and renewable energy. It plays a key role in protecting our planet.

Conclusion

Chemistry is essential because it improves health, comfort, food production, and technological progress. It helps us understand how the world works at a fundamental level.

Chemistry is not confined to the laboratory—it is present in every breath we take and every meal we eat.

Seethalaxmi. K
Lecturer
Department of Chemistry

Life with Elders

A Bond We Should Never Lose

There is something very special about having elders around us. Their presence brings a kind of comfort that nothing else really can. Maybe it is their blessings, maybe their unconditional love, or simply the feeling that someone who has seen so much of life is quietly standing beside us. Respecting elders is not just a value we were taught — it is a feeling that comes from the heart.

In today's busy world, we are always running — studies, careers, social media, endless commitments. Somewhere in this rush, we forget to pause and sit with the very people who once made time for us without hesitation. Think about it... when was the last time you sat with your grandparents just to talk? Not out of duty, but out of genuine interest? When did you last ask your parents about their childhood, their struggles, their dreams?

You will be surprised how much you learn when you simply listen. Their stories are not just memories — they carry strength, patience, hope, and life lessons that no book or lecture can teach. They have faced hardships quietly, celebrated small joys wholeheartedly, and carried responsibilities we can hardly imagine today.

Sometimes we feel elders repeat themselves, worry too much, or seem old-fashioned. But if we look deeper, it comes from love. They want us to be safe, happy, and successful. Their advice may sound simple, but it often comes from years of real experience.

What elders really want from us is very little — not expensive gifts, not grand gestures. Just time. A small conversation. Sitting beside them. A walk together. Listening without hurry. These little moments mean everything to them. And honestly, they do something beautiful to us too — they ground us, calm us, and remind us what truly matters.

One day, life moves on. People grow older. Situations change. And then those simple moments we postponed become the ones we miss the most. That empty chair, that silent corner of the house — it makes us realise how precious those conversations were.

So let us not wait for special occasions. Let us create ordinary moments filled with warmth. Sit with your elders. Ask them about their lives. Laugh with them. Listen to their advice, even if you don't always follow it. Let them feel they are important — because they truly are.

To my fellow young generation, this is a heartfelt request: give your elders your time, your patience, and your love. These are the memories that stay forever. These are the relationships that shape us into better human beings.

Respecting elders is not tradition alone.
It is gratitude.
It is love.
And above all, it is a beautiful way of staying connected to our roots while moving forward in life.

Business Studies:

A Complete Foundation for Commerce Students

Business Studies is a comprehensive subject that provides students with a clear understanding of the functioning of business organizations and the economic environment. It plays a vital role in shaping the foundation of commerce students by introducing them to management, finance, marketing, entrepreneurship, and global business practices. The subject prepares students for higher education and real-world business challenges.

Importance of Business Studies

The importance of Business Studies lies in its ability to combine theory with practical knowledge. It helps students understand what to do and what not to do in business, enabling them to make informed decisions. The subject builds essential skills such as leadership, communication, analytical thinking, problem-solving, and ethical awareness.

Business Studies introduces students to management principles and functions, helping them understand how organizations are planned, organized, staffed, directed, and controlled. It also creates awareness about Corporate Social Responsibility (CSR), highlighting that businesses have social and environmental responsibilities along with profit-making.

Most importantly, Business Studies acts as a basic foundation before graduation, making it easier for students to understand advanced concepts in commerce, management, and professional courses.

Scope of Business Studies

The scope of Business Studies is very wide and covers almost every aspect required by commerce students.

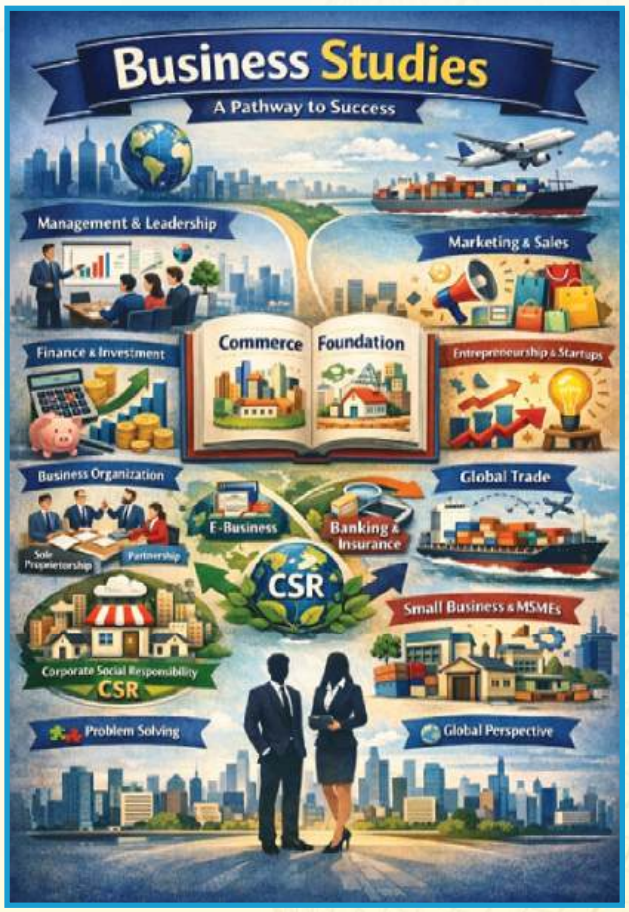

It includes the study of industries, explaining how goods and services are produced and distributed. Students learn about forms of business organization, such as sole proprietorship, partnership, joint Hindu family business, cooperative societies, private companies and public companies, and their suitability in different business situations.

The subject covers sources of business finance, capital markets, and the stock market, helping students understand how businesses raise funds. It also includes banking and insurance, which explain financial services, risk management, and economic stability. Business Studies gives detailed knowledge of marketing management, including product planning, pricing, promotion, and distribution, along with consumer protection, ensuring awareness of consumer rights and responsibilities. With technological advancement, the subject also covers e-business and emerging modes of business, preparing students for the digital economy.

Topics like small business and entrepreneurship highlight innovation, startups, MSMEs, and employment generation.

Role of Business Studies in Industry

Business Studies plays a significant role in preparing students to understand industrial operations and organizational structure. Knowledge of management, human resource practices, finance, marketing, and production helps students understand how industries function efficiently. Concepts related to human resource management help industries recruit, train, motivate, and retain employees. Financial knowledge supports budgeting, investment decisions, and cost control, while marketing concepts help industries compete effectively in the market. By learning about business ethics, CSR, and legal aspects, students understand the importance of sustainable and responsible industrial growth.

Significance of Business Studies in International Business

In a globalized economy, Business Studies has great significance in understanding international business. Students learn about export and import procedures, foreign trade, documentation, and international markets. The subject explains how global businesses operate, the role of foreign trade in economic development, and the challenges faced in international markets. Knowledge of international business prepares students to adapt to global competition, cultural differences, and changing trade policies. This global exposure helps students develop a broader perspective and prepares them for careers in multinational companies and global trade.

In over all

Business Studies is a complete and foundational subject that covers management, finance, marketing, entrepreneurship, industry practices, and international business. It equips students with basic knowledge of every major aspect of commerce, making higher studies easier and more meaningful. By providing a strong conceptual and practical base, Business Studies plays a crucial role in developing future managers, entrepreneurs, and responsible business professionals.

Ranjitha .R
Lecturer
Department of Business Studies

Finding Yourself Along the Way

Writing this article takes me back to my PU days—a time filled with questions, dreams, and quiet struggles. PU days mark a transition from school life to undergraduate studies. It is a phase where you are no longer a child, yet not fully an adult. Standing at the crossroads of life, you begin making choices while still discovering who you are. It is a vulnerable phase, filled with confusion and curiosity.

During this time, some students are clear about their future goals. Some find themselves torn between two different paths. And many honestly have no idea what they want to do. If you belong to any of these groups, remember—you are not alone. Uncertainty is not a weakness; it is a natural part of growing.

One important truth I learned is this: the course you choose does not completely define your life. It is just another stepping stone in your journey. With every step forward, your exposure increases and your perspective widens.

No matter which course you choose, learning how to communicate and connect with people is just as important as academic success. The friendships you build, the conversations you share, and the networks you create often become silent bridges to future opportunities, guidance, and growth.

Learning does not end with exams, degrees, or certificates. It is a lifelong process. Every experience, success, failure, and challenge teaches you something valuable. Be open to learning—not only from books, but from people, situations, and even mistakes.

Most importantly, remember that change is always possible. No matter where you start, you can always choose a new direction if you have an open mind, courage, and determination. Life is not about having everything figured out early—it is about growing, evolving, and believing in yourself.

So, my dear PU students, trust your journey. Embrace your doubts. Celebrate your efforts. And walk forward with confidence, knowing that every step you take is shaping the person you are becoming.

Accountancy

Language of Business

Accountancy is the language of business. It involves recording, classifying, summarizing, and interpreting financial transactions of a business. It helps in determining profit or loss and shows the financial position through financial statements.

Accountancy is important for decision-making and is legally required under laws like the Companies Act, 2013. It includes branches such as Financial Accounting, Cost Accounting, and Management Accounting.

Accountancy offers wide career opportunities such as:

Chartered Accountant (CA)
Cost and Management Accountant (CMA)
Company Secretary (CS)
Auditor
Financial Analyst
Tax Consultant
Lecturer in Commerce

Accountancy is not just about numbers; it is about understanding the financial health of a business. It plays a vital role in economic development and business growth. Learning accountancy develops analytical thinking, accuracy, and decision-making skills. Therefore, it is an essential and valuable subject in the field of Commerce.

Finally accountancy helps in understanding the financial health and growth of a business.

Dimpu.H.K
Lecturer
Department of Accountancy

"ज्ञानविकासे संस्कृतस्य योगदानम्"- **आधुनिकशिक्षायां संस्कृतस्य प्रासङ्गिकता**

Relevance of Sanskrit in Modern Education

आधुनिकशिक्षा यद्यपि विज्ञान-प्रौद्योगिकी-वाणिज्यविषयेषु केन्द्रिताऽस्ति,तथापि संस्कृतभाषा बौद्धिकशक्तिविकासे,तार्किकचिन्तनस्य संवर्धने,नैतिकमूल्यानां संरक्षणे च महत्त्वपूर्णां भूमिकां निर्वहति। अतः आधुनिकशिक्षायां संस्कृतस्य प्रासङ्गिकता न केवलं सांस्कृतिकदृष्ट्या,अपि तु शैक्षिक बौद्धिकदृष्ट्याऽपि निर्विवादा अस्ति।

Modern education today is largely centered on science, technology, commerce, and professional skills, yet the relevance of Sanskrit remains strong and meaningful. Sanskrit is not only a classical language of cultural importance, but also a powerful academic tool that supports the development of intellectual ability, logical reasoning, and ethical understanding. In an age where education often focuses on external success and technical competence, Sanskrit offers an internal foundation that strengthens clarity of thought, discipline of learning, and value-based living.

Sanskrit is one of the most ancient and structured media through which human knowledge has been preserved and transmitted. From the Vedas and Upanishads to the vast traditions of philosophy, logic, literature, grammar, ethics, yoga, and medicine, Sanskrit has served as the core language of India's intellectual history. The richness of Sanskrit literature reflects a deep exploration of life, nature, society, and the human mind. It provides not only spiritual insight but also systematic approaches to inquiry, debate, and understanding.

A distinctive feature of Sanskrit is its highly logical and organized structure. The sutra-based style of expression trains learners to grasp complex ideas in a concise and precise manner. Its grammar, especially the Paninian system, is known for its scientific clarity and rule-based structure, encouraging analytical thinking and strong memory. Therefore, Sanskrit contributes far beyond language learning—it supports holistic education by integrating knowledge, reasoning, and ethics. For this reason, the role of Sanskrit in modern education is timeless, universal, and academically significant.

1. Philosophy & Knowledge (दर्शन / ज्ञानतत्त्वम्) : Sanskrit philosophical insights define knowledge not as mere accumulation of facts, but as a truth-oriented and transformative realization. Such ideas have shaped deep discussions on metaphysics, epistemology, and consciousness, and continue to influence philosophical inquiry worldwide.

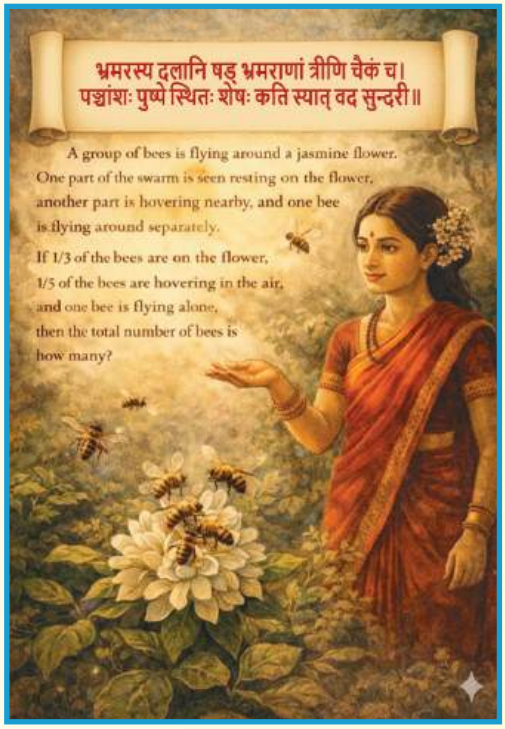

2. Logic & Reasoning (तर्कशास्त्रम्) : The Vaiśeṣika definition provides a rigorous philosophical foundation for understanding substances, their characteristics, and the logic of the physical universe.

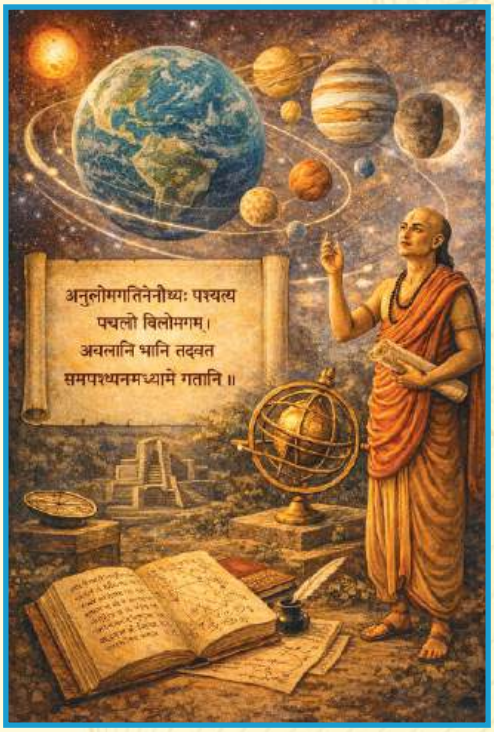

3. Mathematics (गणितम्)

Sanskrit literature preserves a rich mathematical tradition that significantly contributed to the development of global mathematical knowledge. While modern mathematics evolved through multiple civilizations, several key concepts in arithmetic, algebra, geometry, trigonometry, and combinatorics were developed in India and transmitted through Sanskrit texts. These works demonstrate not only computational skill but also a highly systematic and logical approach to mathematical thinking.

4. Astronomy (खगोलविज्ञानम्)

The Sanskrit astronomical tradition, especially the Siddhānta literature, presents a remarkably systematic understanding of celestial motion through mathematical reasoning. Two concepts that strongly connect with modern astronomy are the idea of a gravity-like attractive force and the central role of time in planetary computation.

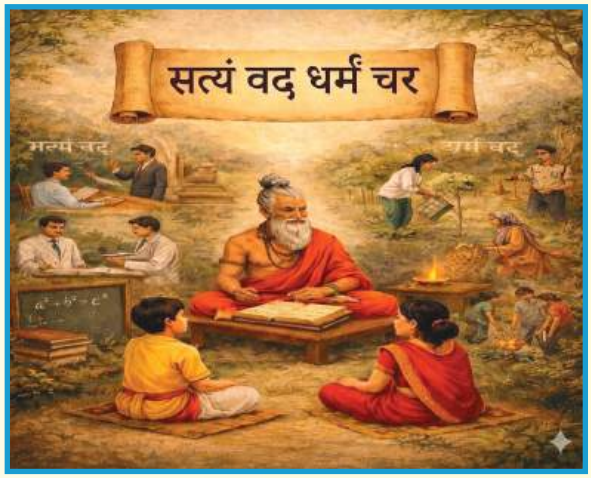

5. Economics & Governance (अर्थशास्त्रम्)

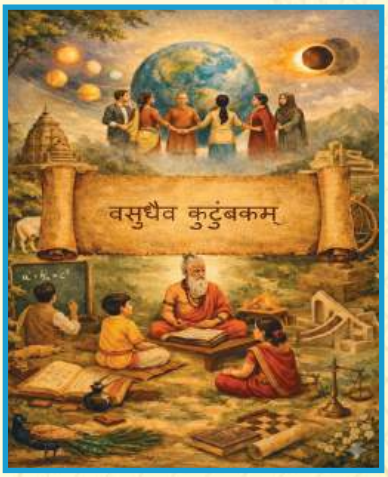

The Sanskrit tradition of अर्थशास्त्रम् (Arthaśāstra) represents one of the earliest systematic approaches to economics, governance, and public administration. The most prominent text, कौटिल्यस्य अर्थशास्त्रम् (Kauṭilya's Arthaśāstra), provides detailed guidelines on statecraft, taxation, law, diplomacy, and resource management.

6. Ethics & Values (नीतिशास्त्रम्)

The famous instruction "सत्यं वद। धर्मं चर।" (*Satyam vada. Dharmam chara.*) from the Śikṣāvallī section of the तैत्तिरीयोपनिषत् (Taittirīya Upaniṣad) is one of the most powerful ethical teachings in the Sanskrit knowledge tradition. These two short sentences are not merely moral advice; they form a complete educational philosophy. Together, these two commands show that Sanskrit education aimed to produce not only skilled individuals but also ethical citizens.

Sanskrit is not merely an ancient language preserved for cultural pride, but a living source of universal knowledge and values that remain deeply relevant in the modern world. Through its rich traditions of logic, science, mathematics, philosophy, ethics, and governance, Sanskrit encourages clarity of thought, disciplined learning, and responsible living. More importantly, it nurtures a worldview rooted in unity and coexistence. The timeless teaching "वसुधैव कुटुम्बकम्" reminds humanity that the entire world is one family, and that true progress is meaningful only when it leads to harmony rather than division. By learning Sanskrit and engaging with its wisdom, individuals can develop not only intellectual strength but also compassion, tolerance, and global ethics. Thus, Sanskrit education can play a vital role in shaping a future where knowledge is guided by values, and where the world moves closer to unity, cooperation, and sustainable well-being.

Vinayak R Bhat
Lecturer
Department of Sanskrit

Economics

In our daily life, all human beings follow the four Purusharthas: Dharma, Artha, Kama, and Moksha. Among these four, Artha means wealth and Kama means desire. Irrespective of their background, everyone works to fulfill their desires (Kama) by earning wealth (Artha).

Therefore, Economics is the behavioural study of human beings and how they earn wealth (Artha) to satisfy their desires (Kama). In the ancient text Arthashastra, wealth and its management are discussed in detail.

In modern times, Economics means the management of resources. The word Economics is derived from the Greek word Oikonomia, where “oikos” means home and “nomos” means management. Thus, Economics originally meant household management.

Economics is not only a subject in the syllabus; it is an important part of our daily life. Mrs. Barbara Wootton gave a meaningful statement on Economics:“Being a citizen of society, everyone must have at least a little knowledge of Economics.”

Kashinath.S
Lecturer
Department of Economics

Impact of Technology on Youth

"Technology is constructing today, but destroying tomorrow."

In today's world, technology is everywhere. From the moment we wake up to the time we go to sleep, we use some form of technology. Mobile phones, computers, televisions, the internet, tablets, smartwatches, and even smart classrooms have become a part of our daily life. For people, especially students, technology plays a very important role. It helps them learn, communicate, and enjoy entertainment. However, like everything else, technology has both good and bad effects. Deciding the effect makes it boon or bane to a young person.

Technology means the use of tools, machines, and ideas that make our work easier and faster. Long ago, people used simple tools like stones and sticks, for even simple calculations. Today, we have advanced machines like computers, robots, and smartphones. The internet allows us to connect with people all over the world in just a few seconds. Technology has changed the way we live and learn.

One of the biggest benefits of technology for youth is in education. Earlier, students had to depend only on textbooks and teachers in classrooms. Now, they can use the internet to find information on almost any topic. Online classes, educational videos, and learning apps make studying more interesting, accessible and easier.

Students can watch videos to understand difficult subjects like computers and science. They can attend online classes from good teachers across the world. Digital libraries give access to thousands of books and notes at the click of a button. This helps students to learn more and improve their knowledge and skills.

Technology also helps students to do projects, prepare presentations, and complete homework. With the help of computers, typing is faster and more neat than writing by hand. This saves time and helps students focus more on learning.

Technology has made communication very easy for young people. With mobile phones and the internet, students can talk to their friends and family anytime, even if they live far away. Social media platforms, emails, and messaging apps allow students to share their thoughts, ideas, and experiences.

Group chats and forums help students to discuss homework, school activities, and exams. Video calls help them see and talk to their friends, family and loved ones. This makes relationships stronger and keeps people connected.

Technology also provides many ways of entertainment for youth. They can watch movies, play video games, and listen to music. Online games help children relax after studying and give them fun and enjoyment.

Some games also improve thinking, memory, and problem-solving skills. Educational games teach subjects like math, spelling, and general knowledge in a fun way. Technology has turned learning into an enjoyable activity, and skill building opportunity.

Using technology helps youth develop many useful skills. Computer skills are very important in today's world. Students who learn to use computers, software, and the internet will find it easier to get good jobs in the future.

Technology also improves creativity. Young people can draw, write stories, edit videos, and create music using different AI apps and programs. They can also learn new languages, coding, and designing online. This helps them discover their talents and interests.

Although technology has many benefits, too much use can be harmful. One of the main problems is that many young people spend too much time on mobile phones, computers, and video games. This reduces the time they spend on outdoor games, reading books, and talking to family members.

Spending long hours in front of screens can cause health problems such as eye strain, headaches, and poor posture. It can also lead to lack of sleep, which makes students feel tired and lazy during school hours.

When youth spend too much time using technology, they often do not get enough physical exercise. Sitting for long hours and not moving much can lead to obesity and weak muscles. Playing outdoor games like football, cricket, and cycling is important for good health, but technology sometimes keeps children indoors.

A healthy body is very important for a healthy mind. So, young people should balance their screen time with physical activities.

Too much use of social media and the internet can also affect the mental health of youth. Some children feel sad or lonely when they compare their lives with others online. They may feel pressure to look or behave in a certain way.

Cyberbullying is another problem. Some people use the internet to hurt or insult others mentally and emotionally. This can make young people feel scared, unhappy, and stressed.

Technology can be a big help in studies, but it can also become a distraction. Many students get distracted by games, social media, and videos while studying. Instead of focusing on studies, they keep checking their phones.

This can reduce their concentration and affect their performance in exams. Therefore, it is important to use technology mainly for learning and not only for fun.

To get the best benefits from technology, young people should use it in a balanced way. They should set a time limit for using mobile phones, computers, and games. They should also make time for reading, playing outdoors, and spending time with family.

Parents and teachers should guide students on how to use technology safely. They should teach them not to share personal information online and to avoid talking to strangers on the internet.

Schools can use technology to make learning more interesting by using smart boards, projectors, and online resources. Teachers can show educational videos and give digital assignments.

Parents should also be involved. They should talk to their children about their online activities and encourage them to use technology for learning and creativity.

Technology is a powerful tool that has changed the lives of youth in many ways. It helps in education, communication, entertainment, and skill development. At the same time, it can cause health problems, distraction, and mental stress if used too much.

The key is to use technology in a smart and balanced way. If young people use it wisely, technology can help them become smarter, more creative, and successful in the future. Technology is a good slave, but a bad master. Technology can be helpful or harmful depending on how we use it. So, let us choose to use technology for good and make our future bright and happy.

Beyond Numbers:

The Beauty of Mathematics

"Go down deep enough into anything and you will find mathematics."

— Dean Schlicker

Mathematics exists in every field and aspect of life, even if it is not obvious at first. When we study something only on the surface, we may not notice mathematics. But when we analyse it deeply, we discover numbers, patterns, measurements, and logical relationships.

Nature appears natural and free, yet mathematics is found in the symmetry of flowers. One such popular example is the Fibonacci spiral, which shows how simple numbers can create complex and beautiful patterns. It demonstrates the deep relationship between mathematics, nature, and art.

The human ear shows a natural spiral shape, especially in the outer ear. When this spiral is studied closely, it resembles a Fibonacci spiral. Ancient pyramids, especially the Egyptian pyramids, are remarkable examples of advanced mathematical knowledge.

Sikku Kolam (Tamil) designs are rooted in various mathematical principles, which include bilateral or rotational symmetry, few geometric concepts, and Fibonacci sequences. This promotes mental wellness by improving memory and creativity, as it requires planning and spatial awareness.

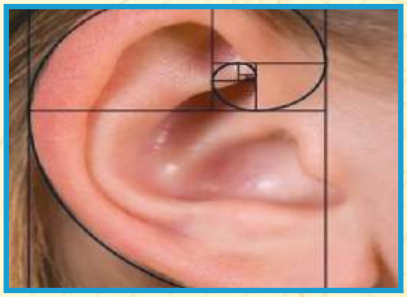

Suma S
Lecturer
Department of Mathematics

In recent times, artificial intelligence is deeply connected to mathematics. Programs like Alpha Geometry and Alpha Geometry combine symbolic reasoning and neural models to solve complex geometry problems.

Deep learning models rely on linear algebra and calculus. Recommendation engines use matrix factorisation. Robotics motion planning uses geometry and optimisation. Medical diagnosis makes use of probability and statistical models.

Hence, mathematics is everywhere—from nature to technology, from daily chores to cutting-edge research, making it an indispensable part of real life.

Mathematics is the language of the universe. It helps us think logically, solve problems, and turn ideas into reality. The more we learn, the more doors it opens in science, technology, art, and daily life. We should try to embrace it and use it to enhance our quality of life.

A Kaleidoscope of Life in Surana

My passion lies in teaching
Literature is my soul's craving
For almost a decade, I stumbled, learning,teaching
The environment at Surana was healing.
Teachers,friends, principal, staff and students too
Each, a guide taught me life's lessons true..
In a world fickle as morning dew
Thankful for the comrades new.
I will miss the bonds we have made
But I am eager for life's new escapade!

Every person needs a muse
Keats a nightingale, shakespeare the black lady,
Someone to adore, something to push one to make news,
Me? My muse is
Surreal,
Undaunted,
Ravishing,
Altar of learning,
Nest of teachers,
An amenable founder and principal....

Nirupama Rajagopal
Lecturer
Department of English

A Note from your Physics Teacher

When most students hear the word Physics, the first reactions are often fear, formulas, and numericals. But Physics is far more than equations written on a blackboard—it is the language of nature.

A Day Where Physics Walks Beside Me

Physics doesn't announce its presence in my life with formulas or diagrams. It simply walks beside me, quietly doing its job.

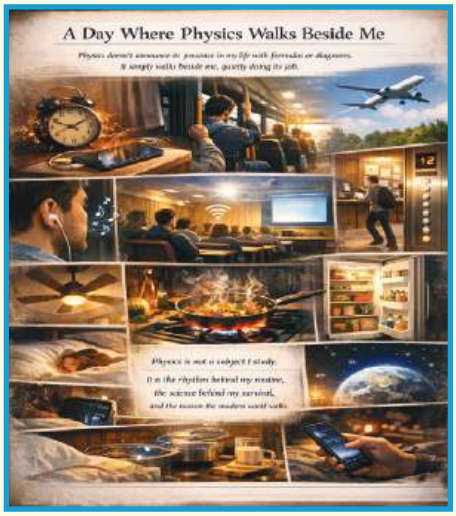

My day starts with a vibrating phone—tiny electrons racing through circuits, turning electrical energy into sound. I don't think of semiconductors while silencing the alarm, but they're already working overtime. As I rush out, gravity reminds me I'm not floating away anytime soon, and friction makes sure I don't slip on the stairs.

The commute to college feels ordinary, yet it's a moving physics lab. Sudden brakes throw me forward—inertia in action. The hum of the engine, the rotation of wheels, and the balance of motion and force keep the journey smooth. Even my earphones turn electrical signals into music using nothing but physics magic.

In college, ceiling fans slice through air, projectors bend light, and Wi-Fi invisibly fills the room with waves carrying information. Between lectures, the elevator lifts me effortlessly, obeying precise calculations of force and acceleration. Physics doesn't just sit in my syllabus—it powers the entire campus.

Back home, cooking becomes thermodynamics, the refrigerator fights entropy, and late-night scrolling depends onwaves travelling at the speed of light. By the time I fall asleep, physics hasn't stopped—it's just switched to silent mode.

Physics is not a subject I study.
It's the rhythm behind my routine,
the science behind my survival,
and the reason the modern world works.

Department of Physics

प्रेरणा की किरण – आदरणीय अर्चना सुराना जी को समर्पित

वह सिर्फ एक नाम नहीं,
एक दिशा है, एक विश्वास है,
जहाँ भविष्य अँधेरे में भटके,
वहाँ उनकी सोच एक प्रकाश है।
कदमों में जिनके सपनों की आहट,
आँखों में विद्यार्थियों का कल,
हर मुश्किल को मुस्कान में बदलना–
यही है उनके नेतृत्व का बल।
वे सिर्फ संस्थान नहीं चलातीं,
वे जीवन को गढ़ती हैं,
हर छात्र में छुपे आत्मविश्वास को
नई उड़ान देती हैं।
जहाँ हिम्मत डगमगाती है,
वहाँ उनका भरोसा खड़ा रहता है,
"तुम कर सकते हो" –
उनका यह वाक्य, जीवन भर साथ रहता है।
सुराना की पहचान बनी,
संस्कार, शिक्षा और सम्मान,
उनके नेतृत्व में हर छात्र
बनता है एक सशक्त इंसान।
आज हम सब उनके आभारी हैं,
जो हमें सपने देखना सिखाती हैं,
अर्चना सुराना जी–
आप सिर्फ निदेशक नहीं, हमारी प्रेरणा है
हम सब आपके हमेशा आभारी हैं।

सुराना कॉलेज

यहाँ सपनों को मिलती है उड़ान,
यहाँ हर दिल में जलता है ज्ञान।
सुराना की छाया में पलते हैं हम,
हर कदम पर मिलता है नया आसमान।
किताबों की खुशबू, शिक्षकों का साथ,
हर मुश्किल में बनते हैं हमारे हाथ।
संघर्ष से सीख, सफलता की राह,
सुराना देता है जीने का पाठ।
कक्षा से मैदान तक गूँजती है शान,
संस्कृति, खेल, प्रतिभा की पहचान।
आज जो हम हैं, कल जो बनेंगे,
उसकी नींव है सुराना महान।
हम गर्व से कहते हैं पूरे जहान,
सुराना है हमारा अभिमान।
सपनों को पंख, सोच को आसमान,
सुराना है ज्ञान की पहचान।
हर राह यहाँ रोशन लगती है,
सुराना से ही मेरी उड़ान जगती है।
किताबों में उम्मीद, दिलों में जान,
सुराना है मेरा अभिमान।
जहाँ मेहनत से मिलती है पहचान,
वही है सुराना महान।

मेरे छात्रों के उज्जवल भविष्य के लिए बदलती तस्वीर

एक दिन सब बदल जाएगा
आज जो दर्द है, वही कल की सबसे बड़ी जीत बनेगा।
इंतज़ार कठिन है, पर समय हर घाव भर देता है।
जब आपको लगे कि सब खत्म हो गया है,
तभी एक नई शुरुआत होती है।
बस खुद पर भरोसा रखना मत छोड़ना

Statistics:

A Distinguished Path for Ambitious PU Students

Understanding Statistics

Statistics is a refined branch of mathematics devoted to the systematic collection, analysis, and interpretation of data. In an era governed by information and technology, statistics serves as the intellectual framework that transforms numbers into knowledge and insight.

Why Statistics Is an Elite Choice at the PU Level

Selecting statistics at the PU stage reflects foresight and academic maturity. The subject cultivates advanced analytical thinking, logical precision, and decision-making ability—skills highly valued across professional domains. Unlike memory-based learning, statistics emphasizes reasoning, application, and clarity of thought, providing a strong foundation for higher education in mathematics, economics, commerce, science, and technology. With data becoming the backbone of global progress, statistics offers relevance, resilience, and long-term value.

Prestigious Career Pathways in Statistics

Statistics opens doors to respected and high-impact professions, including:

- **Statistician:** A highly regarded role in government bodies, researc institutions,and international organizations, known for stability and intellectual stature.

- **Data Analyst / Data Scientist:** Among the most elite and well-compensated careers of the modern age, driving decisions in global corporations and technology firms.

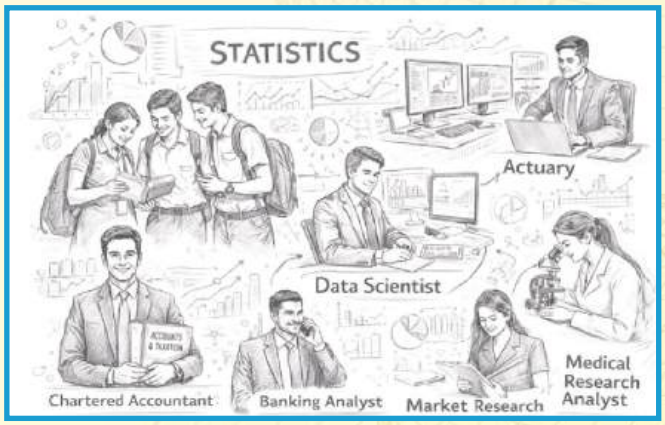

- **Actuary:** A globally recognized profession in the insurance and financial sector, admired for its exclusivity, precision, and exceptional earning potential.

- **Chartered Accountant (CA):** A prestigious and trusted profession where statistical knowledge strengthens financial analysis, auditing, taxation, and strategic decision-making.

- **Banking and Financial Analyst:** A trusted position involving strategic investment planning, risk assessment, and economic forecasting.

- **Market Research and Business Analytics Expert:** A career that blends data expertise with strategic insight to shape business growth.

- **Medical and Research Statistician:** A role of social importance, contributing to healthcare advancements and scientific innovation.

Conclusion

In essence, statistics is not merely a subject of study but a mark of distinction—offering intellectual depth, professional prestige, and enduring career excellence for PU students.

Lecturer
Department of Statistics

The Art of Being a Responsible and Successful Student

विद्यार्थिजीवनं मानवजीवनस्य आधारस्तम्भः अस्ति। एषः कालः तपस्या, अनुशासनं, ज्ञानार्जनं, चरित्राङ्कनं च बोधयति। विद्यार्थी "काक चेष्टा, बको ध्यानं" इत्यादीन् पञ्चलक्षणान् अनुसृत्य विद्याम् अर्जयति। एतत् सुवर्णकालं ज्ञानवर्धनं, गुरुभक्तिं, परिश्रमं च शिक्षयित्वा भविष्यस्य कृते मार्गं प्रशस्तं करोति।

मानवजीवने विद्यार्थिकालः परमं महत्त्वपूर्णं भवति। एषः कालः एव विद्यार्जनस्य, व्यक्तित्वविकासस्य च सर्वोत्तमः समयः अस्ति।
शास्त्राणां अनुसारं विद्यार्थी आदर्शरूपेण पञ्चलक्षणयुक्तः भवेत् -
काक चेष्टा बको ध्यानं, श्वान निद्रा तथैव च ।
अल्पहारी गृह त्यागी, विद्यार्थी पंच लक्षणं ॥
अर्थात् काकवत् प्रयत्नं, बकवत् ध्यानं, श्वानवत् निद्रा, अल्पाहारं, गृहत्यागी (ज्ञानार्थं सुखत्यागः) च।
विद्यार्थी जीवने अनुशासनं, समयस्य पालनं च अतीव आवश्यकानि भवन्ति।
विद्यार्थी सदैव निष्ठावान्, आज्ञाकारी च भवेत्।
मुख्यं कर्तव्यं पाठानां अध्ययनं, गुरुणां आज्ञायाः पालनं, ज्ञानार्जनं, चरित्रनिर्माणं च अस्ति।
शिक्षा केवळं पुस्तकेभ्यः न भवति, अपि तु प्रकृतेः, समाजस्य, अनुभवस्य च शिक्षा प्रदाति। एतस्मिन् काले क्रीडा, समाजसेवा च अपि आवश्यकी अस्ति।
अतः विद्यार्थिजीवनं तपस्या अस्ति, यत् जीवनस्य आधारं सुदृढं करोति।

Student life is the foundation pillar of human life. This period teaches penance (dedication), discipline, acquisition of knowledge, and character building. A student acquires knowledge by following the five qualities described as “effort like a crow and concentration like a crane.” This golden period enhances knowledge, devotion to teachers, and hard work, thereby paving the way for the future.

In human life, the student phase is extremely important. It is the best time for gaining education and developing one’s personality. According to the scriptures, an ideal student should possess five qualities: Effort like a crow, focus like a crane, light sleep like a dog, eating in moderation, and readiness to sacrifice comfort for the sake of knowledge.

In student life, discipline and proper use of time are extremely necessary. A student should always be sincere and obedient. The main duties of a student are studying lessons, obeying teachers, acquiring knowledge, and building character. Education does not come only from books; it is also gained from nature, society, and experience. During this time, sports and social service are also important.

Therefore, student life is a form of dedication and discipline that strengthens the foundation of one’s entire life.

Akhila Shastri
Admin Department

My Students, My Everlasting Pride

As a Lecturer at Surana College, my greatest joy comes from my students. People often say that today's generation no longer shows respect to teachers and elders. It is a common complaint I hear in many conversations. However, my experience has been completely different. The students here have always filled my heart with pride through their discipline, humility, and respectful nature. It is visible in the way they greet their teachers, listen attentively in class, and carry themselves with quiet dignity. These small yet meaningful gestures remind me every day that respect and gratitude are still very much alive in the younger generation I meet every day in college.

My students are ever willing to help. Whether it is volunteering for college events, assisting in morning assemblies, or taking up any responsibility entrusted to them, they do it with sincerity and commitment. As teachers, when we ask them to do something, they do it wholeheartedly.

They are sweet, sensitive, and deeply caring. I remember a moment that left a lasting impression on me. Once, a person came to take a demo class and unintentionally taught them an incorrect letter format. After he left, the students gently pointed out the mistake to me. They said they didn't ask him because they didn't want to make him more nervous, as it was already a demo session. That moment revealed the depth of their empathy.

When I look into their eyes, I see warmth and affection, that gives me a strong motherly feeling. The Teachers' Day programme organized by the students was excellent and truly heart-warming. That event will always be remembered as one of the most cherished memories in my life.

Lekshmi R H
Lecturer
Department of English

Their small gestures reflect the strong values they carry within them. One day, when I entered the classroom, all the students stood up as usual. At that moment, someone came to the classroom entrance to ask me something important.

I stepped outside to give clarification. When I returned after a minute or two, I noticed that the children were still standing. I gently asked, "Why are you all still standing?" They replied, "Ma'am, you didn't ask us to sit." In that moment, I didn't just see my students, I saw the exquisite respect and discipline they uphold.

On days when I take leave, my phone fills with messages asking if I am okay. That concern, that thoughtfulness, reassures me that teaching is not just a profession, it is a relationship built on trust, respect, and love. What touches me the most is their humility, if they commit a mistake, a sincere apology comes immediately from them. That sense of responsibility and respect is rare, and it makes teachers feel deeply valued.

At times, I honestly wonder whether Surana admits only such wonderful students, or whether Surana moulds children into such thoughtful and respectful individuals.

Words are not enough to fully capture the love, respect, and pride I feel for my students and what they mean to me. My heart has much more to say than my words. Yes, they are naughty and playful, but there is a certain cuteness in it that makes them even more lovable. Their mischief carries an innocence that only adds to their charm.

My deepest joy is witnessing my students evolve into confident souls who stay humble at heart, embrace every challenge with courage, and ascend toward the zenith of their dreams, growing into responsible and exemplary citizens who uphold strong values and contribute positively to society.

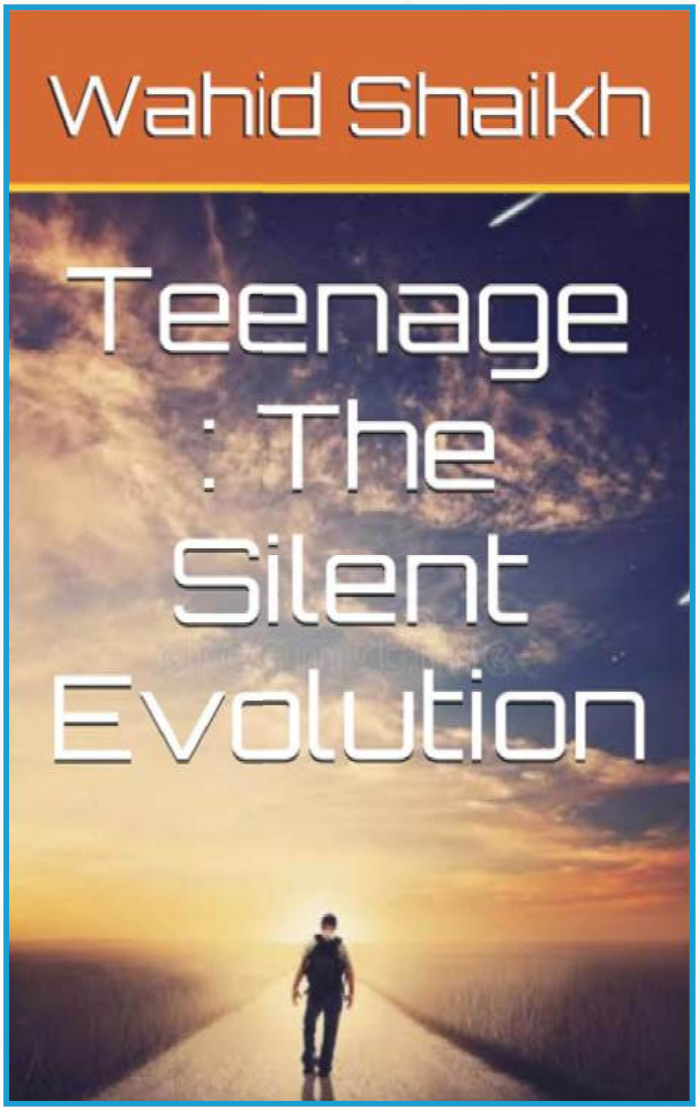

Celebrating a Student Author

About the Author

Our student, Wahid [II SEBA], wrote this book based on real emotions, personal observations, and the psychological experiences of teenagers. This is his first book, created not as a psychologist or psychiatrist, but as someone who understands teenage struggles from within. Through honest words and relatable thoughts, he aims to reflect the silent growth, challenges, and feelings many teenagers experience but rarely express.

Book Description: Teenage: The Silent Evolution is a reflective and emotionally grounded exploration of adolescence - a phase too often dismissed, misunderstood, or silenced. Written from the heart of a student, this book does not offer instructions or ready-made solutions; instead, it captures what many teenagers feel but rarely express - the quiet chaos, the invisible growth, and the inner battles hidden behind every day faces. Blending poetic reflections, real-life experiences, psychological insights, and raw emotion, it gives voice to what grows silently beneath the surface - identity, fear, strength, resilience, and self-worth.

Pen and Perspectives of Suranaites

My Role Model

"I believe a role model is truly a mentor — someone we see daily, someone whose actions quietly teach us lessons for life." I happened to read a quote like this somewhere, and it has stayed in my heart ever since. Sometimes, the greatest inspirations in life are not the ones we look for — they are the ones quietly standing right in front of us. This article is my way of sharing a secret realization with you.

During a mock interview session in our college, we were asked a simple yet thought-provoking question: "Who is your role model?" Most of my classmates gave the same answer — our Principal Sir. I, however, mentioned someone else. I prefer not to reveal who it was, but from that moment, one question stayed in my mind:

Why does everyone admire him so much?

That curiosity slowly turned into observation. I began noticing Sir more — not just as a principal, but as a person. I already knew that he is a motivational speaker. Whenever he speaks, everyone listens. His command over language, his confident accent, and the powerful way he presents his thoughts make people listen with admiration. He doesn't just speak — he connects. He doesn't just talk — he makes us feel confident and hopeful. He knows exactly how to convince and inspire students. Many of my friends follow his YouTube and Instagram pages. Whenever they feel low or discouraged, they watch his motivational talks and come back feeling stronger and more positive. Imagine a principal who can cheer up his students even through a screen!

But that was just the beginning of what I discovered.

I learned that Sir is an exceptionally talented photographer. Every picture he takes tells a story. His photographs are not just images — they are emotions captured in frames. In a way, even his photos feel like silent motivational speeches.

I too started tracking Sir's social media pages and WhatsApp status. Sir is also invited to many institutions as a chief guest. At that moment, I realized how fortunate we are to see him every day on our campus.

Yet, what touched my heart most were the small, simple moments in our college. On Children's Day, Sir personally served food to the students. That gesture showed his affection and love for us. Another day, when he gently reminded students to cut their nails and maintain cleanliness, I didn't see a strict principal — I saw a caring father figure.

Sports Day revealed yet another inspiring side of him. I was amazed to see that he is also a skilled sportsman and plays badminton very well. Recently through his WhatsApp status, I came to know that he is a theatre artist too. The more I learn about him, the more I realize that his personality has many layers — leader, artist, speaker, mentor, sportsman and above all, a compassionate human being. The more I learn about him, the more I feel that there is still so much more to know.

Today, I finally understand why so many of my friends proudly call him their role model.

And here is my little secret — I changed my role model. Now, the person I look up to, the person who inspires me, is my Principal Sir. Sometimes, we search far and wide for a role model, without realizing that the person who inspires us the most is already right in front of us.

My role model is my Principal – Shri. Karthik Krishnan Sir

Srilakshmi.M.M
II SEBA

From the Desk of the President

Batch 2025–2026

V. Srividya
II CEBA

Here we are at the end of a golden era—a time filled with untold stories, cherished friendships, and memories, that have shaped who we are today. As the President of our college, it has been my greatest honour to represent such a vibrant, talented, and inspiring group of students.

Our teachers, with their constant support and guidance, have helped us grow into confident individuals ready to embrace the future. As we step forward into new beginnings, let us carry these moments close to our hearts and continue to chase our dreams with courage and determination.

— President, Batch 2025–2026

Each Day Can be a Good Day

Leena R.
I SEBA

Sometimes, when things go wrong,
it is not easy for us to forget,

the joy that we have experienced
and the good fortune that we have met.

Those rough times become good times
to cherish friends that we have known,

of the favours that they have shown,
to think of the fun-filled times we've spent,

the wonderful places that we've been,
the beauty that life offers us time and again.

On a day when things go wrong,
don't give up; rather, embrace the memories

and think of the joyous days.
Live young. Live free. Live joyfully.

Children's Day at Surana

Vatti Lakshya
I SEBA

Our recent Children's Day celebration was an extraordinary spectacle that turned the traditional college hierarchy on its head. Our classrooms were traded for the stage as our teachers took the lead in a programme dedicated entirely to us.

The highlight of the day was undoubtedly witnessing the unfiltered, playful side of our teachers. It was really thrilling to see a stern lecturer break into a goofy dance and also to see them rock the stage with their energetic moves and melodious voices. It was a side of our lecturers we had never seen — joyful, spontaneous, and wonderfully "un-academic."

What touched us the most was the sense of being truly cherished. Knowing that our teachers stepped out of their comfort zones and spent hours preparing these performances specifically to celebrate us was incredibly special. It reminded us that beyond grades and assignments, there is a profound bond of care and affection that binds teachers and students.

This celebration wasn't just a break from classes; it was a beautiful reminder of the warmth that defines our campus community.

Surana Family

A Home Away from Home

Divya S
II CEBA

I came to Surana as a stranger, unsure who I was or who I would become. But this campus quietly shaped me. Friendships grew through laughter, shared benches, and tiny moments, turning strangers into family.

Discipline arrived in funny ways—running early to class to escape punishments and sit-ups—yet those moments, built responsibility and confidence. Surana taught us to care for our surroundings. Manthana helped us explore our hidden strengths, and Kshitij showed us pride in leading and organizing inter-school events.

Sports Day pushed us to try our best, while Teachers' Day reminded us that gratitude and celebration come from effort and heart. The library taught silence, teachers taught life, and every corner of the campus reflected respect, care, and warmth.

Surana didn't just educate us; it shaped our attitude, confidence and our dreams.One day, we will leave this campus chasing our dreams, but the memories, lessons, and bonds will stay with us forever. Surana isn't just a college; it is a home. Like our Principal always says, **"Welcome to the Surana family."**

Beyond Books

Learning Beyond the Classroom

Ragavi.S
II PCMB

A Journey of Self-Discovery

Stepping out of our comfort zone often leads to the most meaningful experiences. The residential program was one such journey that left a lasting impact on me academically, personally, and emotionally.

Living in a residential setup with students from different Surana campuses was initially overwhelming. Being surrounded by toppers and new faces made me nervous, but that feeling soon turned into motivation. The environment pushed me to observe, learn, and grow every single day.

One of the most commendable aspects of the program was the quality of faculty and teaching. Both internal and external faculties were available throughout the program, and each one of them brought valuable knowledge, clarity, and dedication to the sessions. The faculty members were highly supportive, approachable, and committed to giving their best to us.

The facilities and arrangements provided during the residential stay were well organized and of high standard. The accommodation was clean, comfortable, and conducive to learning. Special appreciation goes to the food arrangements, which were hygienic, nutritious, and thoughtfully planned.

The wardens played an essential role in making this experience safe and comfortable. They took care of us with great responsibility, discipline, and kindness. Their guidance, attention to detail, and prompt support ensured a well-managed and peaceful residential environment.

The program helped instill a strong sense of discipline and time management. Following a well-structured daily routine taught us punctuality, responsibility, and the importance of balancing academics withself-care. We were provided with one hour of self-study every day, which helped us develop independent learning habits. Additionally, daily sports sessions refreshed our minds, promoted teamwork, and maintained physical well-being.

The program offered much more than academic exposure. From structured sessions to hands-on learning, we were encouraged to think critically, ask questions, and apply concepts practically.

Beyond academics, the residential experience taught me independence and adaptability. Sharing spaces, managing time, and interacting with peers from diverse backgrounds helped me develop confidence and communication skills. The late-night discussions, shared laughter, and mutual support created memories I will cherish forever.

One of the most beautiful aspects of the residential experience was life without mobile phones. Being away from digital distractions allowed us to live fully in the present moment. We communicated more and truly connected with one another. This also taught us the value of mindfulness and reminded us how beautiful life can be when we pause and truly live each moment.

I express my heartfelt gratitude to our respected Principal, Mr. Karthik Krishnan Sir, whose encouragement, leadership, and trust made this wonderful opportunity possible. His vision and motivation inspired us to step out of our comfort zones and embrace learning with confidence and determination.

Most importantly, this program helped me believe in myself. It showed me that growth begins when we challenge our fears and embrace new opportunities.

The residential program was not just an academic initiative but a transformative journey of self-discovery, discipline, and personal growth. I am deeply thankful to the institution, faculty members, wardens, organizers, and everyone involved for creating such a meaningful experience. The lessons learned, memories created, and values gained during this program will remain with me forever and continue to guide me in my future endeavours.

The College Trip - An Excursion to Club Cabana

Tejas Vijaykumar
II SEBA

College life is usually just a cycle of classes, assignments and lab records, so when the department announced a trip to Club Cabana in Devanahalli, we were all hyped. The day started a bit early since the buses arrived from other campuses, but honestly, the vibe on the ride there made it worth it. It wasn't the usual boring commute; everyone was in high spirits, screaming till their throats were sore, blasting music and overtaking other buses.

One of the best parts about this trip was how much value we got out of it. We paid a really low price for the ticket, so I wasn't expecting anything crazy, but it turned out to be a massive steal. The resort was huge, and we had access to everything without having to pay extra for every little thing.

The biggest surprise, though, was the teachers. In class, they are usually super strict and serious. But out there? They were completely different. It was like their "strict mode" was disabled for the day. They were joking around, smiling, and just chilling with us. It was actually cool to see that side of them. We even had some wild moments with the teachers too.

Once we got in, went to get breakfast immediately we raided the buffet. Just like the games, the food was unlimited, and it was genuinely good. We definitely made the most of that. We were not only taking seconds but third servings too.

Then right after we hit the water games. Since it was unlimited access, we didn't have to worry about time limits or tickets; we just spent hours on the slides and in the pool. Then after our lunch, which again was amazing and best part, it was unlimited; we played for some time longer then played some other games too.

We spent the rest of the time just walking across the resort. The place was massive with access to various other games such as billiards, archery, human foosball and many! By the time we got back on the bus, we were exhausted but happy. It was a solid day: good food, great price, and good vibes with the faculty but most importantly, great times with our friends.

I Am Not What You Assume

You're trying hard to read my ways,
But I am not for worldly praise.
My path is drawn by faith and light;
I guard my heart, I guard what's right.

I do not stray, I do not roam;
My soul finds peace, in prayer, in home.
Just one I love, I stay sincere;
Not even bonds of respect draw near.

A word, a smile—I keep them pure;
My values rest in faith for sure.
I tease at times, but still I know
The line where true intentions go.

If you felt hurt, I offer peace—
No holding fire, no false release.
Not even bonds of class or role
Can shift the values in my soul.

So take these words, if you still care,
Or leave them gently in the air.
I have no mask, no role to play,
Just faith and truth to guide my way.

And truly, friend, if pain you've known,
Then let me say—please leave me alone.
Don't give thought or deep reflection;
I don't deserve your kind attention.

Voices of a Student's Mind

B. Rakshitha Naidu
II PCMC

We carry dreams in a crowded bag,
Between heavy books and silent fears.
Deadlines tick louder than my heartbeat,
Yet hope whispers, "Hold on, you're still here."

Marks stare at me like final judgments,
While effort hides behind sleepless nights.
All ask for ranks, results, perfection—
No one asks how hard I fight.

We smile in corridors filled with noise,
But inside, questions scream our name.
"What if I fail?"
"What if I'm not enough?"
"What if success never come?"

We scroll through lives that look complete,
Filters hiding every fall.
Comparing our chapters one
With someone else's final call.

Yet even in moments of doubt,
A quiet strength within us grows.
Braver versions of ourselves emerge,
Teaching our hearts to raise their voice.

We are more than grades or labels,
More than numbers, ranks, or fame.
We're becoming OURSELVES - honestly
And that itself is BRAVE.

अंकों से आगे

Kshitij Kumar Singh
I PCMC

सबने अंकों में तौला, कक्षाओं में बाँटा,
पर कक्षा के बाहर है उम्मीदों का साटा।
नंबर, रैंक और तुलना की होड़,
कहीं खो गया बचपन का वो मोड़?
माँ-बाप की चाहत, समाज की बात,
हर तरफ सवाल–कब बनेगी पहचान?
दिल कुछ और, दिमाग कुछ कहे,
युवा खुद का रास्ता समझ न पाए।
असफलता उस बन बैठी जंजीर,
सफलता मापी जाती अंकों की लकीर।
कोई नहीं पूछे–तू कैसा है?
बस पूछते हैं–रिज़ल्ट कैसा है?
पर इसी भीड़ में जलती है एक लौ,
जो कहती है–रुक मत, खुद को जानो।
दबाव नहीं, भरोसा चाहिए,
युवा को सहारा, रास्ता चाहिए।
अगर सपनों को मिले सही उड़ान,
और दबाव से मिले थोड़ी पहचान,
तो यही युवा लिखेगा इतिहास,
कब का भारत होगा और भी महान

कहने को तो बेटी है

Priya
II PCMC

घर में जब स्त्री जन्म लेती है,
कहने को तो बेटी है,
लेकिन कहलाती है पराया धन।
क्यों जन्म लेते ही बन जाती है वह बोझ?
क्यों कि वह काम करती है।
कहने को तो लोग गाते हैं–
"बेटी बचाओ, बेटी पढ़ाओ" ,
लेकिन न मानते हैं वह नारा–
"अपनी बेटी पढ़ाओ।"
कहने को तो लोग कहते हैं बेटी लक्ष्मी है,
घर की लक्ष्मी,
लेकिन भेज देते हैं
दूसरे किसी और के घर की लक्ष्मी।
कहने को तो लोग बेटी की इज़्ज़त की क़सम खाते हैं,
लेकिन उसी इज़्ज़त की क़ीमत
अनजान व्यक्ति के हाथों
चुपचाप चुका देते हैं।
कहने को तो बेटी विधवा होती है,
लेकिन उसके संग
उसके सारे रिश्ते मर जाते हैं।
कहने को तो बेटी वह शक्ति है,
जिससे जन्म लेते हैं इंसान,
लेकिन कहलाती है अभिशाप,
न रहती है उसे अपने माँ-बाप पर अधिकार।
एक समय के बाद
तो लगता है उसे
क्या यह सच है कि वह मात्र बेटी है?
कहने को तो बेटी है।

My Experience at the Residential Program

Mishwa Sharma
II PCMB

The Residential Program was an exclusive initiative for integrated students, designed to give us the best opportunity to prepare beyond regular academics, especially for competitive exams. I am truly thankful to the Surana management team and to Dr.Archana Ma'am, whose idea shaped this wonderful program.

I feel grateful to have been selected for this residential program. The selection was based on our First PU performance as well as our Second PU competitive scores, which made it a proud and motivating achievement for me.

This program brought together students not only from Surana PU College, Peenya, but also from the Southend and Chandapura campuses. It was a great learning experience for me — not just in studies, but also in learning to live without mobile phones. Though it was a bit challenging at first, it helped us stay focused and disciplined.

Our day started as early as 6 a.m. We had to be ready in uniform and be on time for classes, which continued until 8 p.m. Despite the long schedule, we were given enough breaks and about one and a half to two hours for sports, which helped us relax and refresh.

One of my favorite parts of the residential stay was the food. We were served a wide variety of delicious meals prepared without onion and garlic — Jain food — and I truly enjoyed it every day.

The facilities provided were excellent. The place where we stayed was always neat and tidy, which created a very positive and comfortable environment for us. The wardens took great care of us for 15 days, treating us like their own children. Their support made us feel safe and at home.

A memorable highlight of the program was our visit to Micro Labs. It was an exciting opportunity to explore how medicines are prepared. The staff there explained everything clearly and patiently answered all our questions. It was an eye-opening and inspiring experience.

I also enjoyed studying with my friends and making new ones. Many external faculty members took time from their busy schedules to teach us special tricks and shortcuts that are not found in textbooks. Teachers from the Peenya, Southend, and Chandapura campuses also handled classes for us. All the internal and external faculty members were truly excellent.

Overall, the Residential Program was beyond my expectations. It helped me step out of my comfort zone, become more disciplined, and move closer to achieving my goals. I sincerely thank the Surana management for giving us such a valuable platform and unforgettable learning experience.

A Trip to Club Cabana

Ranjitha T.R
II PCMC

TRIP might be a small word of just four letters, but the memories we make during our trip are priceless. A trip is not just a regular journey; it is a journey filled with joy, excitement, curiosity, laughter, and of course, dance and music!

We had our trip to Club Cabana Resort. As soon as we reached our destination, we just loved it. Everyone was filled with curiosity, wandering how the place would be and about the games there. The hospitality was extremely good.

There were people around us apart from our college, which might make one panic, but as soon as we saw someone from our college — SURANAITES — we felt at home. This made us realize that we are like a family — "SURANA FAM."

The games at the resort were good, especially the water games. The slides were adventurous. One who didn't even know how to swim spent hours playing in the water.

The lazy pool was one of the best there; you don't have to be lethargic to play in it. The food was too delicious; if you are a foodie, it is sure that you will like it.

There were not only water games but also rope games, archery, bowling, and many other games. The decoration of the resort was stunning.

This trip gave us a lot of memories which will be cherished by us for a lifetime. I am grateful for this opportunity. I thank the management and our principal Karthik Krishnan Sir and our faculties who accompanied us to the trip. They made us forget that they are our Lecturers for a moment — that's how friendly they were. Thank you, Surana.

Science in Everyday Life

Thanushree R
II PCMB

Science is an integral part of our daily routines, impacting various aspects of our lives. From morning to night, its influence shapes our experiences and contributes to our understanding of the world around us.

Technology and Communication:
In the modern age, science's impact on communication technology is undeniable. Devices like smartphones and computers have revolutionized the way we connect with others. The science behind wireless networks and data transmission allows us to send messages, make calls, and share information effortlessly across the globe. This technology has bridged distances and made the world a smaller, more connected place.

Healthcare and Well-being:
Science plays a vital role in maintaining our health and well-being. Medical advancements, rooted in scientific research, have given rise to life-saving treatments, surgical procedures, and diagnostic tools. From vaccines that prevent diseases to high-tech medical imaging that allows doctors to see inside our bodies, science enables us to lead healthier lives and overcome medical challenges.

Everyday Convenience:
Many of our daily conveniences are the direct result of scientific innovations. Electricity powers our homes, lighting up our lives and enabling a host of devices to function. Home appliances, from refrigerators to washing machines, are designed with principles of science in mind, making our chores easier and more efficient. These conveniences enhance our quality of life and free up time for other activities.

Conclusion:
Science's impact on our daily lives is profound and far-reaching. From technology and communication to healthcare, convenience, and environmental awareness, its influence is evident in every corner of our routines. By recognizing the role of science, we are empowered to contribute positively to the world around us.

I Will Start Tomorrow

Bindushree S
I SEBA

The biggest lie you tell yourself is that "I will start tomorrow" instead of acting now. By postponing things,we often leads to not doing it at all, resulting in a loss of trust in yourself.

You keep putting things off until you reach a point where you completely abandon them because you lack confidence in yourself.

If you truly intend to do something or really need to do it, do it now—without hesitation and without excuses—because that is when you overcome yourself, and it will be much easier for you in the future. You don't even have to do the whole thing; on the contrary, start small, because beginning is the hardest part and requires the most effort.

The more you overcome this hurdle, the easier it will become. So, the next time you have something planned—whether it is a chore or something you always wanted to do—START NOW, in small steps, and don't put it off for the future, because then you will never do it.

Why AI is a Student's New Study Buddy

A few years ago, "AI" sounded like something meant only for computer science students. Today, it is sitting in our pockets, helping us survive some of our most stressful Accountancy problems and Business Studies theories. But while some people worry that AI is making us "lazy," most of us know the truth: it is actually making us sharper—if we use it right.

Vatti Lakshya
I SEBA

1. Your Personal 24/7 Accounts Tutor

We've all been there. It's 11 p.m., and you're trying to balance a balance sheet, but one "hidden adjustment" is making the totals mismatch. Your teacher is asleep, and your friends are just as stuck as you are. That's when AI steps in. AI tools act like a "universal translator." You can ask it to explain the treatment of interest on capital as if you are a beginner, and suddenly the logic clicks. It's not about getting a shortcut; it's about understanding the why behind the numbers.

2. Breaking the 'Theory Block'

The hardest part of Economics or Business Studies is the sheer volume of theory. AI is the perfect "brainstorming partner." It can help you take a 20-page chapter on Principles of Management and turn it into a five-point summary or a set of flashcards. It helps you see the structure of the argument so you can focus on memorizing the key points rather than getting lost in the text.

3. Staying Organized

Being a PUC-level commerce student is a balancing act—CA/CS foundation classes, college, and trying to have a social life. Technology now handles boring stuff. From AI-powered planners that schedule your study breaks to apps that turn your messy notes on "Business Finance" into clean, searchable digital text, technology is doing the heavy lifting for our organization. AI now helps students to clarify, to organize, and to explore.

Good Things About My College

Integrated Competitive Coaching

The college offers specialized integrated programs that combine regular PUC classes with coaching for NEET, JEE, and KCET for science students, and CA/CMA foundation support for commerce students.

Tejas Y
I PCMC

Strong Academic Record

It consistently achieves high results, building a track record of 100% results in II PUC Board Examinations for multiple consecutive years.

Modern Infrastructure

Students have access to 'A' grade facilities, including smart classrooms with audio-visual tools, well-equipped science and computer laboratories, and extensive libraries and reading halls.

Personalized Mentoring

Faculty members are often highlighted in reviews for being approachable mentors who provide personalized academic monitoring, doubt-Clearing Sessions and Career Guidance.

Value-Based Environment

Rooted in Jain philosophy, the institution focuses on discipline, ethics, and character building, fostering a safe and motivating atmosphere for students.

My Experience in Enacting the Skit 'Six Enemies of Mind'

Leena R.
I SEBA

Participating in the skit on the topic "Six Enemies of the Mind" was a memorable and enriching experience for me. The skit was performed on stage during the inauguration of our English Club named 'Thinkspace'. The preparation and practice sessions required dedication and teamwork. We practiced regularly to understand the depth of the concept and to improve dialogue delivery, expressions, and stage coordination. Balancing practice with college schedules was challenging at times, but our collective effort and mutual support made the process smooth and enjoyable.

The story of our skit and the script were completely prepared by our English teacher, and they were very meaningful and relevant to real life. The story revolved around the six internal enemies of the human mind—desire, anger, greed, attachment, pride, and jealousy. Each enemy was represented through a character, showing how these negative traits influence human behaviour and decision-making. The storyline clearly portrayed how these enemies slowly control a person's thoughts and actions, leading to inner conflict and poor choices, and how self-awareness and discipline can help overcome them.

The moral of the skit was that - true peace and success come from controlling our mind and overcoming its negative tendencies. It highlighted the importance of self-control, mindfulness, and moral values in leading a balanced life. This message was powerful, especially for students, as these inner enemies often affect our emotions and goals. This message was not only for the audience but also for us as performers.

The impact of the skit was highly positive. The audience responded well and appreciated the concept and performance. Many found the message relatable and thought-provoking. Personally, this experience helped me gain confidence and importance of understand teamwork. the Most importantly, it made me reflect on my own thoughts and actions.

Overall, this was a valuable learning experience that I will always remember.

A Surreal Conversation Between My Poetic Innocent Soul vs the Voices of the Revolutionaries I Admire – Inside Me:

Roses are Red, Violets are Blue - Adolph Hitler said 'The victor does not always tell the truth.'

Tulips are Pink, Dandelions are yellow - Sun Tzu said 'All wars are won on deception, fellow!'

Orange is Tangerine, Tangerine is Orange - Lenin said 'Be radical as the world or else survival will be a challenge.'

The person who broke from inside says 'You have lost my trust.' Then the voices in my head got louder, 'Do you believe in God? Then you must believe in the Devil. Do you believe in failure? Then you must believe in success.'

The God does good, The Devil does evil - Both do it for man's gain And to ignore either is in vain.

Speech is a double-edged sword. It can make either a friend or a foe. Choose your words with care. It can stab people without a tear.

Every person is unique, Everyone is special.

Some live in the light. And make the world a little brighter. A few live in the dark to make the world a little warm. Who are you to judge who is right or wrong?

Kick your ego and be proud of the gift, your LIFE
This is the only thing that will help you win in your life.

Havish Sagar
I PCMB

Gift of Nature

Thanushree R
II PCMB

Nature is calm, nature is wise,
With glowing stars in open skies.
It gives us rain, it gives us snow,
And help the little flowers grow.

The forests deep, the rivers bright,
The shining moon, the morning light.
It gives us fruits, it gives us air,
And asks us only to take care.

But if we harm and do not see,
We lose the birds, the clean blue sea.
So, plant a tree and keep it green,
Let's make the Earth safe and clean.

Together we must love and share
This world is so full of life and care.
It's nature's love that makes us strong,
So, let's protect it all lifelong.

Nature is so good and kind,
And never makes us rude or blind.
It gives us everything each day
Without expecting things in pay.

It gives us food to eat
And gives us shade to reduce the heat.
It is so green and helps us stay clean,
With billions of trees and cliffs so keen.

So, it is our duty to protect nature
And stop the melting glaciers.

Heartfelt Poem for My Mother

Rakshitha.S
I CEBA

In your hands, the world felt small,
Yet in your love, I found it all.
A gentle voice, a guiding light,
That carried me through the darkest night.

You carried the storms so I could rest,
You gave your all, your very best.
Through every trial, near or far,
You lit my path—a guiding star.

The world feels brighter by your grace,
Warmth and kindness in your embrace.
No crown or throne could shine above
A mother's endless, selfless love.

So here I stand, with words so true,
My every prayer begins with you.
For all I am, and hope to be,
Is rooted in your love for me.

Memory and Its Mysterious Habit of Selective Loyalty

Wahid
II SEBA

Memory and Its Mysterious Habit of Selective Loyalty Memory is a strange and stubborn magician living quietly inside us, performing its daily tricks without any applause. Sometimes it behaves like a loyal friend who stands by you in your darkest hour, and sometimes it behaves like that one classmate who vanishes the moment group work begins. It remembers the lyrics of songs you don't even like, the most embarrassing things you've ever done, the smell of your old classroom, the exact tone of your teacher when they caught you talking, and yet it somehow forgets the simplest formula during an exam. Selective loyalty at its peak. But that's the beauty, or the comedy, of the inner world we carry with us every single day.

Our memory is not a servant; it's a royalty with mood swings. Students know this truth intimately. In fact, if memory had a complaint box, students would break the record for the highest number of submissions. Not because our brains are weak, but because our minds are overflowing with too many worlds at once. We're remembering lectures we didn't understand, pretending to understand things we didn't hear, storing feelings we won't talk about, hiding fears we Don't want noticed, memorising half-solved examples, replaying moments with friends, planning futures we're expected to build, and carrying expectations we never asked for. Between all this, it's a miracle we remember anything at all. Memory, inside the mind of a student, is not a calm library; it is a chaotic festival with firecrackers, confusion, and the occasional surprise dance performance. Things pop in and out. Thoughts collide. Past and present shake hands without invitation. If the brain were a place, students would be living in a city during peak traffic hours with all signals blinking red. Yet the world expects us to behave like monks meditating under waterfalls. And that gap—the distance between how students actually function and how society expects them to function—is exactly why this article belongs in a college magazine.

People often assume students simply live with knowledge. But the truth is, we live inside knowledge.

We swim in it, trip over it, choke on it, dream in it, wake up with it, and sometimes try to outrun it. Knowledge is not a distant idol sitting high on a shelf; it's a persistent neighbour knocking on our door reminding us about deadlines, exams, applications, and the Big Future everyone talks about as if it's a guest arriving next week. Knowledge sits inside us like rainfall. Sometimes steady, sometimes stormy, sometimes refreshing, sometimes overwhelming. It grows quietly, leaf by leaf, somewhere in the invisible garden inside the mind. To the outside world, learning appears simple: read, understand, remember, repeat. But to the student who actually experiences it, knowledge is a whole ecosystem inside the body. It changes the mood, reshapes thoughts, challenges beliefs, and sometimes even burns down old ideas just to grow better ones. And memory is the soil where all these seeds fall. Some grow, some vanish, some stay dormant for years before sprouting at the most unexpected moments. That is how real learning happens: silently, internally, imperfectly, beautifully.

Every student carries not one life but many—the life they are living, the ones they imagine, the ones they fear, and the ones they're told to prepare for. And in the middle of all these parallel timelines floats the strange creature called memory, trying its best to organise the mess without any user manual. Is it loyal Yes. Is it chaotic Absolutely. Does it take things personally Always. That is why it remembers every small insult but forgets every important date. Memory, knowledge, attitude, arrogance—these four shape a student faster than any syllabus. Knowledge gives the fuel, memory gives the shape, attitude gives the direction, and arrogance gives the warning sign. Attitude is the climate inside the mind. A hopeful mind stores everything with colour. A stressed mind stores only fear.

A proud mind remembers nothing except itself. But a humble mind grows endlessly.Students who remain open learn from everything. A look, a moment, a note, a conversation, a mistake, a heartbreak—all become chapters in the inner textbook of life. A student with the right attitude learns even without being taught. Arrogance, on the other hand, is the enemy of memory. Arrogance shuts the windows, locks the doors, and builds high walls. It convinces the mind that it already knows enough. And the moment you stop being a student in spirit, memory stops working for you. It folds its arms, sits back, and watches you struggle. Humility is not a weakness; it is the oxygen of learning. It keeps the inner world open, breathable, and alive.

Now let's talk about the secret reason behind writing this piece for the magazine. Every college publishes glamorous stories, brilliant achievements, outstanding results, and inspiring messages. But rarely does anyone talk about the invisible world inside each student. The place where fears whisper, where dreams flutter, where doubts echo, where courage wakes up late but still shows up, where memories hide in corners waiting to be found again. This inner world is the real campus. This is where the real education happens. This is where a student becomes who they truly are. No teacher can fully see it, no parent can fully enter it, and no friend can fully understand it. But you, the student, live there 24 hours a day. In the silence between lectures, in the noise of group chats, in the pressure of expectations, in the sweetness of friendship, in the weight of choices, in the mystery of the future. It is only fair that the place you live in the most gets some attention in the magazine that represents you.

Memory is the unofficial storyteller of this inner world. It arranges your life like a scrapbook without asking which moment deserves a bigger page. It keeps scars and smiles next to each other. It hides lessons inside pain. It packs wisdom inside mistakes. It gives meaning to days that seemed ordinary. That is why students must understand their memory—not to fight it, but to work with it. Not to force it, but to guide it. Memory is not something you fill. It is something you cultivate. Students must remember one truth: you are not supposed to remember everything. You are only meant to remember what shapes you. And that is exactly what memory does. It throws away the unnecessary and keeps the things that might matter one day. It keeps experiences because facts might fade but experiences transform. It keeps emotions because emotions teach It keeps failures because failures sharpen. It keeps success because success nourishes. The world inside you is so vast that even you have not explored all of it yet.

Your understanding of yourself is still under construction—beautifully incomplete, constantly improving. And that is the best part. You are a work of art being painted by time, memory, knowledge, choices, mistakes, courage, and love. No masterpiece is created overnight. It takes layers. It takes patience. It takes chaos. But eventually, it becomes breathtaking. Students often believe their mind is not enough for the world. But the truth is that the world is not enough for your mind. You will think thoughts no one else will think. You will see patterns no one else will see. You will create memories that only you can store. You will become the guardian of an inner world that is larger than entire continents. The outside world may judge you by your marks, your attendance, your achievements, or your mistakes, but the inside world judges you by your effort, your sincerity, your curiosity, your growth. And growth is happening inside you even on days when you feel stuck.

Memory is working even when you feel blank. Knowledge is settling even when you feel confused. Attitude is forming even when you feel lost. The inner world is always moving, always learning, always becoming. Trust it. So here stands this article, printed on paper but living inside your thoughts, trying to remind you of something simple yet profound: the greatest journey you will ever take is into your own mind. The deepest adventure is learning yourself. The richest treasure is hidden in your memory. The greatest tool is knowledge. The best weapon is attitude. And the strongest shield is humility. And now, as promised, the ending you chose, perfectly fitted into this inner-world journey, a final line dipped in sarcasm and student reality: So go ahead and explore your mind while you still have time, because once exam season hits, even your memory will pack its bags and go on a holiday without notifying you. Students understand this better than anyone. Our brains don't forget trauma; they celebrate it like an annual festival.

Report on Visit to The Indian Institute of Science (IISc) Campus

Introduction:

On 12-06-2025, a group of second-year PU Science students from Surana Independent PU College, along with their respected teachers, visited the prestigious Indian Institute of Science (IISc) campus located in Bengaluru, Karnataka. The purpose of the visit was to explore the academic environment, research facilities, and overall infrastructure of one of India's premier institutions for advanced scientific and technological research. This report presents the key observations, experiences, and insights gained during the visit.

The students were warmly welcomed, and we were served a delicious meal. After a brief orientation by a physics professor on quantum photonics, we were guided to the laboratory. There, we learned how quantum photonics are prepared and measured. Subsequently, we visited the Raman Scattering Laboratory. We enjoyed learning physics in a practical manner rather than in a purely theoretical way.

Conclusion:

The visit to the Indian Institute of Science was both inspiring and informative. It offered us a unique opportunity to witness ongoing research, interact with passionate scholars, and experience the vibrant academic environment of one of India's top scientific institutions. This visit not only deepened our appreciation for science and research but also motivated us to pursue academic excellence in our respective fields. We are grateful for the opportunity and hope to carry forward the knowledge and inspiration gained through this enriching experience.

The exposure to advanced laboratories, innovative projects, and the intellectually stimulating campus atmosphere left a lasting impression on all of us.

Article about Teachers

Teachers are often described as the backbone of society, and for good reason. Every profession—doctors, engineers, artists, scientists, and leaders—begins with a teacher who helps shape the mind and character of an individual. Yet, despite their profound influence, the work of teachers often goes unnoticed, overshadowed by the more visible achievements of the people they help mould. It is impossible to overstate the significance of the role teachers play in building both individuals and communities.

At the heart of good teaching lies dedication. Teachers do far more than delivering lessons; they inspire curiosity, encourage critical thinking, and help students discover their potential. They adapt to different learning styles, find creative ways to explain difficult concepts, and provide emotional support when students struggle. A teacher's patience can spark confidence, and their belief in a student can ignite ambition.

In today's fast-changing world, the responsibilities of teachers have expanded. They are expected to integrate technology into lessons, address diverse learning needs, navigate social and emotional challenges, and prepare students for a future that is constantly evolving. Despite these demands, teachers continue to show resilience and adaptability, demonstrating their commitment to education and the well-being of every student.

Beyond academics, teachers teach values such as respect, kindness, responsibility, and perseverance. They model empathy and fairness, helping students grow not only as learners but also as human beings. A single encouraging word from a teacher can stay with a student for a lifetime, shaping their self-esteem and guiding their choices.Ultimately, teachers are nation-builders. The classrooms they lead today shape the societies of tomorrow. Their influence reaches far beyond college walls; woven into the stories of the countless lives they touch.

Teachers deserve recognition, appreciation, and support—not only on special occasions but every day. They are more than educators; they are mentors, guides, role models, and lifelong sources of inspiration.

Chamundi Hills

Mysuru is the land of palaces, the heritage city, cultural capital of Karnataka and the Sandalwood City.

I am extremely glad to share some information about my native, Mysuru Once upon a time, there was a cruel Asura (demon) called Mahishasura. He was very powerful and was a cunning and a deceitful demon. Mahishasura was the son of Ramba. Once he prayed to lord Brahma to get a boon from him.. He was blessed that he could be killed only by a girl.

This boon made him powerful.. He fought with all gods and even Devendra was scared. He took over heaven and even troubled the people on earth.

The Gods went to Lord Shiva, Lord Vishnu and Lord Bramha.. The 3 Gods merged to form Goddess Durga ...She carried many weapons. The goddess Durga and Mahishasura fought for 10,000 years. Devi killed Mahishasura, when he took the form of a buffalo, with a trishula. Henceforth she was called Chamundeshwari (Mahishasura Mardhini). Goddess killed him on the hills which were then called Chamundi Hills.She is the Kula deiva (the family deity) of the Mysuru royal family and the state's presiding deity. It is one of the shakti sthalas ..It is said that Sati's hair fell here.

During Navaratri, the goddess is decorated as the Navadurgas. There is a huge bull sculpture which is made of a single stone(monolith) This is a 17th century masterpiece (Circa 1659 - 1673) commissioned by Dodda Devarajan Wodeyar. The sunset point in Chamundi Hills in Mysuru, located about 15 minutes from the city, offers panoramic elevated views of the landscape, including the Mysuru palace and KRS dam.

My Lovely Teachers

Yes, my parents and I have made a good decision by choosing Surana. Here, I have gained many valuable experiences that will always stay with me. One of the best things about my college is my lovely, respectful teachers. Each one of them is unique in their own way. They are friendly and strict when needed.

Another aspect that makes my teachers truly special is the care they show beyond academics. During a time when I was facing serious health issues, my teachers personally checked on my health and well-being. Their concern made me feel safe and supported, like I truly mattered as a person and not just as a student.

My female teachers, in particular, share a warm emotional connection with me. A gentle pat on my shoulder, a comforting smile whenever they see me, and their willingness to text me online whenever I have doubts—these small gestures mean more than words can express. They make learning feel personal and reassuring.

One of the most memorable days at Surana is Children's Day. On that day, our teachers showed a completely different side of themselves. They were creative, talented, and playful—performing like children for us. Their efforts reflected pure love and dedication towards their students. Children's Day holds a special place in my heart because of the heartfelt words spoken by our teachers. Their speeches were so touching that anyone emotional like me couldn't stop the tears. It was a day filled with warmth, joy, and unforgettable memories.

I would also like to sincerely thank our principal, who is truly the best I have ever seen till my 10th standard. He is inspiring, energetic, always smiling, charming, and a true representative of youth.

Looking back at these experiences, I can confidently say that Surana wasn't lying when it said, "Surana: Moulding Characters and Careers."Through the care, values, and guidance of its teachers and leadership, Surana College truly lives by its words.

The Conversations Around Us

Wahid
II SEBA

They say nature speaks, but only to those who listen.
One night, beneath the quiet sky, I overheard a dialogue—
Five voices whispering.
Earth spoke first: "I am the cradle. I hold roots, bones, and memories.
Yet people carve scars on me and call it progress.
"Water followed: "I am flow. I quench thirst and carry tears.
But when I rise in anger, I remind you— I was never yours to own.
"Fire laughed softly: "I am hunger and light, destruction and rebirth.
In my flame, civilizations cook their food and burn their wars.
"Air sighed: "I am breath—unseen but essential. People choke me with smoke, Yet still beg me for one more inhale."

Finally, Space whispered— "The quietest, yet the loudest. I am the canvas where all others paint. Without me, neither earth nor water, nor fire nor air could exist."

Then all five spoke together:"We are not outside you. We are you. Guard yourself, and you guard us."

When I woke up, I stood still.
I saw earth in my own body—bones holding me upright.

I saw water in my veins—the flowing river.
I saw fire in my heartbeat— The warmth and passion that kept me alive.
I breathed air into my lungs—an unseen gift I never earned.

In the silence of my thoughts, I found space— endless, infinite, and eternal.

And when we stop speaking to them—When we destroy the earth, we destroy our own body.

When we pollute water, we poison our own blood.

When we misuse fire, we burn our own courage.

When we dirty the air, we choke our own breath.

When we forget space, we silence our own dreams.

Because, in the end, they don't really need us. It is we who need them.

And forgive me, reader—If you came looking for an essay, I'm afraid this was never one.

This small sheet of paper is not enough to describe nature;

it deserves a multi-volume project.

It was just a conversation I overheard— between life itself and us.

You may accept this piece of work or choose to ignore it,

but these five will not stop speaking, whether you hear them or not...

Mother and Father:

Two Pillars of a Child's Life

Navyashree N Gowda,
I SEBA

Love from parents is one of the strongest forces shaping a child's emotional, social, and moral development. Although every family is unique, the love of a mother and the love of a father are often described as two complementary pillars that support a child's growth. Each expresses care in different ways, yet both are equally important in building confidence, security, and a sense of belonging.

Mother's Love: Nurturing and Emotional Strength

A mother's love is often associated with warmth, comfort, and emotional closeness. From early childhood, this love is felt through care, patience, and understanding. Mothers often provide a safe space where children feel free to express their emotions, fears, and dreams without judgment. This nurturing bond helps children develop empathy, emotional awareness, and resilience. Knowing they are accepted and valued, gives them the confidence to face challenges and build healthy relationships with others.

Father's Love: Guidance and Protection

A father's love is frequently expressed through guidance, encouragement, and protection. Fathers often help children understand boundaries, responsibility, and discipline while also motivating them to explore the world with courage. This type of love teaches independence and self-belief. When a father shows consistent support and interest, children learn the values of trust, respect, and perseverance.

Different Expressions, Same Purpose

While motherly and fatherly love may appear different in expression, their purpose is the same: to help children grow into balanced and confident individuals. Mothers may comfort and reassure, while fathers may challenge and guide, but both forms of love work together to provide emotional stability and essential life skills. When children experience love from both parents, they are more likely to feel secure and understood.

The Lasting Impact

The love of a mother and a father do not end with childhood. Its influence continues throughout life, shaping values, decisions, and self-worth. Even in adulthood, the lessons learned through parental love—kindness, responsibility, courage, and resilience—remain deeply rooted and continue to guide individuals.

Conclusion:

The love of parents is not about perfection, but about presence, care and commitment. Together, they form a powerful foundation that helps children grow, dream and thrive. This becomes a lifelong source of strength and guidance.

Scoring vs Learning -

The most undervalued fact

Parimala M
I SEBA

In most classrooms today, learning has quietly turned into a race—a race to score higher, finish the syllabus faster, and move on to the next exam as quickly as possible. But somewhere in this rush, the real purpose of education gets blurred. A student may score full marks in communication skills but still struggle to speak confidently, just like many of us who prepared for exams without taking any real action. Marks matter, yes, but they are not the end goal. What truly matters is what we take from our books into the real world.

Today, students often fall into a trap called peer pressure. When society puts the spotlight on "top streams" or "famed careers," students tend to follow the same direction without even exploring what they truly love or what they are made for. The fear of being judged becomes stronger than the desire to discover their passion. Instead of choosing a path based on their interest or talent, they choose based on what others expect.

Studies and research (Deci & Ryan) show that learners who pursue education from a place of internal interest, autonomy, and purpose retain knowledge better and persist longer than those driven mainly by external rewards such as marks or grades. Therefore, choosing the right path or having a dream goal or purpose in life is important, irrespective of the size of the dream. If you are studying only for the report card, then you might be cheating your future self who is in search of opportunities.

The harsh truth is that only scoring high does not guarantee a job anymore. Companies want people who can think, create, solve problems, and adapt. Marks may help you clear an interview, but skills help you stay in the room.

Surveys show that more than 70% of employers, including companies such as Google, IBM, LinkedIn, and other global hiring platforms, give more importance to skills rather than just marks or degrees.

Some interesting facts:
*You forget nearly 90% of what you memorise within nine days.
*Students with a sense of purpose show two to three times more persistence in learning.
*Love the subject, and it will love you back.
*Memory improves by up to 50% when students connect learning to real life.
*Never judge a student by marks, and never be discouraged by your marks, because the world's top creators often had average school marks and were called useless—but they never gave up. Thomas Edison was called "too slow."
Walt Disney was rejected by his school's art teachers
*Your brain learns better through doing than through memorising.
*More than 80% of students have missed their favourite hobbies, games, talents, and time with their beloved parents just to survive in a marathon called ranks, without serving the actual purpose of education.

I would like to quote

DR. APJ Abdul Kalam –

"In a world that is changing faster than ever, the future belongs to those who turn knowledge into action."

Our Earth

Earth is our only home and the only known planet that supports life. Located third from the Sun, it enjoys the perfect balance of air, water, and temperature necessary for living organisms to survive and thrive. From vast oceans to towering mountains, Earth is a remarkable blend of natural beauty, diversity, and balance.

Nearly seventy percent of the Earth's surface is covered with water, making it a unique planet in our solar system. Oceans, rivers, and lakes sustain life by regulating climate and supporting countless species. The remaining land is divided into continents, forests, deserts, grasslands, and mountains—each ecosystem nurturing distinct plants and animals and contributing to the planet's rich biodiversity.

Earth's atmosphere plays a crucial role in protecting life. It shields us from the Sun's harmful rays and provides oxygen, which is essential for humans and animals to breathe. This delicate atmospheric balance makes Earth a safe and habitable place, unlike any other planet we know.

Our planet is home to millions of species, including humans, animals, plants, and microscopic organisms.

All living and non-living components are interconnected through ecosystems. Plants provide oxygen and food, animals assist in pollination and maintain ecological balance, and humans rely on natural resources for survival. This interdependence reminds us that no life exists in isolation.

However, rapid industrialisation, pollution, deforestation, and climate change threaten this fragile balance. Human actions have begun to strain Earth's resources, making environmental conservation not just a choice but a responsibility. Sustainable living, conservation of resources, and respect for nature are essential if we are to protect our planet for future generations.

Earth gives us life, shelter, and sustenance without asking for anything in return—except care. Preserving its beauty and balance is not merely an environmental duty but a moral one. Protecting our Earth today ensures a healthier, greener, and more hopeful tomorrow.

I SEBA

My Life at Surana

Surana College has been one of the most meaningful parts of my life. It is not just a place where I studied commerce. It is where I grew, where I learned to think for myself, and where I met people who changed me in ways I never expected. Getting great results was a proud achievement, but it was never just about marks. It was about mastery, not measurement. It was about the quiet ecstasy of true understanding.

From the first day, Surana felt different. The campus had a quiet charm. There was something about the energy here that made me feel like I belonged here. The teachers were brilliant. They were not just knowledgeable. They were kind, patient, and deeply committed to helping us grow. They never made learning feel like a chore. They made it feel like a journey. A journey woven by resilience, curiosity and the gradual unveiling of our inner selves.

What I loved most was how lucid everything felt. The non-teaching staff were some of the warmest people I met. I loved talking to them. Whether it was a quick chat with the Electrician or a smile from the canteen staff, these small moments added so much joy to my day. They made the college feel alive. They made it feel like home.

Outside the classroom, Surana gave me experiences that shaped me. Cultural events, group projects, random conversations in the corridor, and quiet afternoons in the library.

These moments taught me things no textbook ever could. I learned how to listen, how to lead, how to be present.

I learned that growth is not always bold and meteoric. Sometimes it is subtle, tender and gracefully transformative. The friendships I made here are priceless. I met people who challenged me, supported me, and understood me. We shared notes, shared food, and shared stress before exams too. We laughed through everything and made life feel like a recess against responsibilities. These bonds are not just memories. They are part of who I am now.

I feel grateful. Surana gave me knowledge, yes. But it also gifted me confidence, empathy, and a deeper sense of purpose. It taught me to speak with precision and to think with intention. It gave me a voice. And it gave me the courage to use it honestly.

Surana will always be more than a college to me. It will be a place where I found myself. And for that, I will always be thankful....

YOU.

WHAT MAKES OUR COLLEGE UNIQUE – 10 ASPECTS

1. ACT Philosophy

Our Act Philosophy – Academic, Co-curricular, Transformational - serves as the foundation of a holistic learning experience, a journey through which our students acquire academic strength, co-curricular spirit and transformational impact. The ACT approach transforms every learner, shaping them into High flyers and preparing them for the challenges of the future.

2. Residential Programme [for Science Students]

An exceptional 15 day residential programme is offered to selected students from the Science stream at the Microlabs Facility, Kudulu to strengthen their preparation for Competitive Examinations. During this intensive programme, expert faculty conduct focused classes in core subjects [Physics, Chemistry, Mathematics and Biology], providing in-depth conceptual clarity and exam oriented guidance. The best academically performing students from each Campus are shortlisted to participate in this exclusive programme. This academic year, six students from our campus attended this programme which was organized from December 8th, 2025. The sessions create a disciplined and enriching academic environment that encourages focused learning, peer interaction and overall excellence among the students.

SEI RESIDENTIAL 2025

3.Discipline that reflects our value-based cultural identity

The institution upholds a strong sense of discipline, rooted in a value-based cultural identity, which forms the foundation of our ACT Programmes [Academic, Co-curricular and Transformational Activities]. Students are encouraged to follow a structured routine that promotes punctuality, responsibility and mutual respect, preserving ethical conduct. This environment enhances academic focus and helps to nurture character development, teamwork and self-discipline. Integrating education with values, we shape our students into responsible individuals, upholding their cultural and moral principles.

4. Counselling Cell

Our well-established counselling cell actively supports students by addressing their academic, emotional, and personal concerns in a confidential and friendly environment.

5. Parents-Teachers Meeting

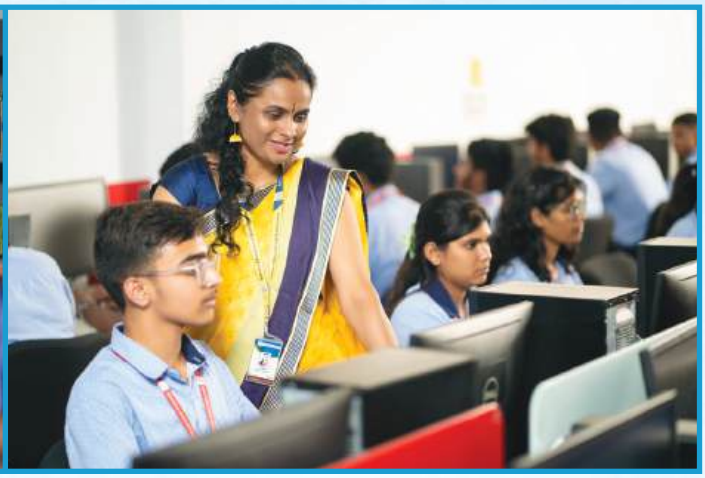

Our Parents-Teachers Meeting is organized in a unique, meaningful and effective way. Our approach is structured, student-focused and collaborative. The meeting begins with a Seminar for parents in the Auditorium, where the Principal of the Institution provides a comprehensive overview of the academic term through a PowerPoint Presentation.

6. Teacher – Student Relationship

The teacher–student relationship at our college is a beautiful blend of warmth, wisdom, and unconditional support. A strong culture of discipline, collaboration, and care for student well-being, leaves a lasting imprint on every student's journey.

7. Platform for every Student to showcase their talent

Our college offers a wide range of co-curricular activities that provide students with ample opportunities to explore their interests and showcase their unique talents. From cultural events, literary activities to sports and creative clubs, every platform encourages students to express themselves, overcome fear, discover their strengths and attain confidence.

8. Mock Interview Sessions

Our mock interview sessions help students build confidence, improve their communication skills, and prepare effectively for real placement interviews.

9. Social Outreach Programmes

College actively promotes social outreach programmes to instill a sense of compassion and responsibility among students. Activities such as visits to Children's Home provide opportunities to share care, time and joy with underprivileged children, fostering empathy and social awareness.

Swatch Surana - Initiatives like cleanliness drive named 'Swatch Surana' is conducted to encourage students to participate in maintaining hygiene and environmental cleanliness within and beyond the campus. We nurture socially conscious citizens, committed to community service and nation-building.

10. Mentorship Programme

This unique programme ensures that students receive individual attention and personalized guidance with utmost affection, so that every student feels supported and valued. Through regular interaction with mentors, students are helped to identify their areas of improvement, understand their academic strengths and challenges, and work on effective strategies to enhance their performance.

A Note of Gratitude

'Pratibimba' is a luminous reflection of our college's soul, capturing academic excellence, cultural vibrancy, achievements in sports, co-curricular accomplishments, and heartfelt literary expressions of our dynamic community. Each page stands as a testimony to the talent, dedication, and spirit that define our institution.

I take this opportunity to express my deepest gratitude to the **Management** for their constant encouragement and unwavering support in achieving this milestone. Their vision and commitment to holistic education continue to inspire every initiative we undertake.

I extend my sincere gratitude to our respected **Principal, Shri. Karthik Krishnan Sir** for the guidance, motivation, and trust reposed in us throughout the journey of compiling this magazine. His steady leadership and encouragement have truly made this collective effort possible.

A special word of thanks to **Hariharan Sir,** Digital Editor, for his remarkable digital expertise and meticulous efforts in designing and shaping the magazine into its present beautiful form. His patience, photography skills and technical skills have truly added life to every page.

I am equally grateful to **Vinay Sir,** Marketing Manager**,** who extended immense support in managing photoshoots, collecting photographs of events held from November 2025 to March 2026 and coordinating essential details from other branches of SEI.

I extend my gratitude to **Kashinath Sir** (Lecturer, Department of Economics) for his constant support throughout this process. With deep gratitude, I acknowledge his sincere support in organizing the photoshoots, ensuring that everything was conducted smoothly and effectively. My sincere thanks also go to **Akash Sir** (Lecturer, Department of Computer Science), who maintained a well-organized collection of photographs of all events held from May 2025 to October 2025. The timely support and careful documentation have helped us beautifully capture and preserve the memorable moments of our college activities. My deep appreciation and heartfelt gratitude go to **Ranjitha Mam** (Lecturer, Department of Business Studies) and **Geethika Mam** (Lecturer, Department of Physics) for their dedicated efforts in collecting alumni achievements, sketches, and feedback articles for the 'Alumni Corner' section and the 'Voice of Achievers' section. Their enthusiasm in connecting with our alumni ensured that every voice found its rightful place in this publication. I extend my special thanks to **Dr. Santhosha Sir,** Physical Education Director**,** for furnishing details for the 'Sports Achievers' section. I would also like to express my gratitude to **Lt. Sudarshan Chalapathi Sir,** Associate NCC Officer, for sharing the details and photographs of the 'Safety and Emergency Workshop'.

My sincere gratitude to all the **faculty members** who contributed their valuable articles to the Staff Article section. Their cooperation and willingness have made this magazine a true reflection of our vibrant academic community. I also gratefully acknowledge **Ashwini Mam,** Admin Department, for providing photographs of our students and alumni, which greatly enriched this edition. I would also like to express my gratitude to **Vanishree Ma'am and Seema Ma'am,** Admin Department, for their thoughtful contributions to the Staff Articles section.

I extend my thanks to the **faculty members of the Editorial Board** for their support in editing student articles. With great affection and heartfelt appreciation, I acknowledge **the student members of the Editorial Board,** who enthusiastically coordinated submissions and ensured that every article and creative work reached me on time. Their energy, responsibility, and teamwork truly made a meaningful difference.

Above all, I express my heartfelt love and gratitude to my dear **students**, the heart and soul of this magazine. Their articles, sketches, reflections, creative expressions, and active participation in various college events have filled these pages with vibrancy and meaning. It is their passion, sincerity, and boundless energy that make this publication a true reflection of our institution's spirit.

This magazine is not merely a compilation of pages; it is a celebration of collective effort, creativity, and shared commitment. May we continue to create, inspire, and grow together.

With gratitude,
Lekshmi.R.H,
Lecturer [Department of English]
[Staff Editor]
